

## Timeline:

- 8.30.24 - City of Savannah (SAV) issues 'pretreatment permit' to Hyundai Motor Group Metaplant America (HMGMA)
- 10.1.24 - SAV sends notice of violation to HMGMA re: September wastewater
- 10.4.24 - HMGMA sends draft Corrective Action Plan (CAP) to SAV
- 10.7.24 - SAV responds to draft CAP; notifies HMGMA that it does not accept it
- 11.7.24 - SAV conditionally approves revised CAP
- 12.6.24 - Georgia Environmental Protection Division (EPD) sends Letter of Concern to HMGMA re: pretreatment requirements
- 12.19.24 - HMGMA sends implementation update to SAV
- 1.3.24 - HMGMA responds to EPD Letter of Concern
- 1.13.25 - HMGMA sends implementation update to SAV
- 1.27.25 - EPD sends Notice of Violation to HMGMA

## Narrative:

### SAV-HMGMA

- City of Savannah issues pretreatment permit for Hyundai's HMGMA site wastewater in late August 2024
- SAV's noted parameter exceedances in September 2024
  - Total Phosphorous
  - Copper (sometimes noted as 'metals')
  - Zinc (sometimes noted as 'metals')
  - Conductivity/Specific Conductivity (SpCond)
  - Total Dissolved Solids (TDS)
  - pH
  - Chemical Oxygen Demand (COD)
- SAV initially rejects HMGMA's initial Corrective Action Plan on various grounds
- SAV eventually conditionally approved of CAP and spells out requirements/phases in Nov. 7, 2024 letter

### EPD-HMGMA

- While SAV was not accepting wastewater, HMGMA contracted multiple companies to transport wastewater to treatment plants or other disposal sites
- Transporters - Months they transported wastewater (documents include volumes)
  - Liquid Environmental Solutions LLC - Nov/Dec 2024

- Re-World - Sept/Oct/Nov 2024
  - Huggins Waste Services - 60gpd to Richmond Hill WWTP
  - Shamrock Environmental Corporation / AquaTerra - Oct/Nov 2024
  - US Water Recovery - Oct/Nov/Dec 2024
- Each Transporter provided a chemical composition analysis of the wastewater
- Wastewater Collection Tickets provided by Hyundai in emails to EPD
- EPD issues Notice of Violation on 1.27.25
  - Requested EPD-HMGMA meeting on February 4, 2025

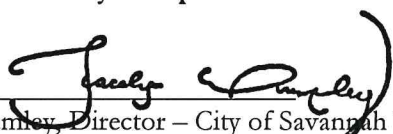

PERMIT NUMBER 20427-11  
TO DISCHARGE INDUSTRIAL WASTEWATER  
TO THE CITY OF SAVANNAH, GEORGIA SEWER SYSTEM

In accordance with all terms and conditions of the City of Savannah Pretreatment Ordinance, hereinafter called "the Ordinance", and also with any applicable provisions of Federal, State, or Local laws and/or regulations, including the U.S. Environmental Protection Agency (EPA) and the Georgia Environmental Protection Division (EPD);

Permission is hereby granted to **Hyundai Motor Group Meta Plant America LLC (HMGMA)**, North American Industrial Classification System Number 336110 (SIC 3711) to discharge treated wastewaters from its facility located at 9728 Highway 280 East (Ellabell, GA) into the sanitary sewer system of the City of Savannah for treatment at the City of Savannah's Travis Field Water Reclamation Facility, located at 198 Darque Road. This permittee is classified as a categorical, significant industrial user and is permitted as required under Title 40, Code of Federal Regulations Part 403 (40 CFR 403) and subject to the requirements of 40 CFR 433 Subpart A, Metal Finishing.

This permit is granted in conformity with effluent limitations, monitoring requirements, plans, special and direct conditions, all of which are filed with and considered as a part of this permit. Waste material generated prior to the effective date of this permit is only authorized for discharge to the City of Savannah after receipt of a letter from the engineer of record (Exhibit A) for the pre-treatment system confirming that the nature and quality of the raw, influent wastewater is consistent with that for which the pre-treatment system was developed (as described in the relevant documentation Gradient/Ecologix, GRT-DOC-0022364, GRT-DOC-0022323, GRT-DOC-0022351, GRT-DOC-0022250, March/April 2023) and containing only the regulated pollutants that have been previously disclosed to the Administrator. Renewal of this permit will require submission of a request to continue discharge which must be received three months in advance of the expiration date.

**Issued this 30 day of August 2024**  
**Effective the 3 day of September 2024 at 12:00 PM**  
**To expire the 2 day of September 2025 at 12:00 AM**

  
Jacelyn Crumley, Director – City of Savannah Water Reclamation

Hyundai Motor Group Meta Plant America, LLC Permit Number 20427-11

**SPECIAL CONDITIONS**

**[1] A. Required Effluent Monitoring and Effluent Limitations**

The Permittee shall submit results for the listed parameters according to the schedule in this part. Except where otherwise noted, all samples shall be 24-hour composite samples of the plant effluent. All samples shall be collected, preserved and tested according to 40 CFR 136 or equivalent methods approved by the EPA. Samples should be delivered to contract or in-house labs no later than 24 hours after sampling is completed due to stringent holding times for certain substances. The sampling schedule as well as the maximum daily and monthly average limits shall be as follows:

<u>Parameter</u>	<u>Maximum Daily Limit</u>		<u>Monthly Average Limit</u>		<u>Sample Frequency (type)</u>
Flow	400,000 gallons		400,000 gallons		1/day (metered) & 1/minute (continuous)
<u>Parameter</u>	<u>Maximum Daily Limit</u>		<u>Monthly Average Limit</u>		<u>Sample Frequency (type)</u>
pH (su)	9.0 Max	6.0 Min	-	-	1/day (grab) & 1/minute (continuous)
TDS (mg/L)	800 Max	300 Min	=	=	1/day (grab)
Specific Conductivity (uS/cm)	1280 Max	480 Min	=	=	1/minute (continuous)
-	<u>mg/L</u>	<u>Lbs.</u>	<u>mg/L</u>	<u>Lbs.</u>	-
BOD <sub>5</sub>	300	1001	-	-	1/Week
COD	500	1668	-	-	1/Week
TSS	280	935	-	-	1/Week
NH <sub>3</sub>	32	107	-	-	1/Week
Phosphorus (T)	4	14	-	-	1/Week
HEM	100	-	-	-	1/Week (Grab)
Cyanide	0.165	0.551	Report	-	1/Week (Grab)
Cadmium (T)	0.008	0.027	Report	-	1/Month
Chromium (T)	0.26	0.87	Report	-	1/Month
Copper (T)	0.14	0.47	Report	-	1/Month
Lead (T)	0.058	0.194	Report	-	1/Month
Nickel (T)	0.397	1.325	Report	-	1/Month
Silver (T)	0.11	0.37	Report	-	1/Month
Zinc (T)	0.274	0.915	Report	-	1/Month
Total Toxic Organics	2.13	7.11	Report	-	1/ Semiannually (Sample type as required by method)
GA Priority Pollutants					1/Semiannually
Per- and Polyfluoroalkyl Substances (PFAS)					Upon Request

- B.** The flow gallons per minute reading will be digitally recorded each minute of the day for the report period and retained for review of permit compliance for 90 days.
- C.** A pH reading will be digitally recorded each minute of the day for the report period and retained for review of permit compliance status for 90 days.
1. A pH limit violation occurs if there is a discharge for more than 60 minutes continuously above pH 9.0 or below pH 6.0 or more than 7 hours and 26 minutes total time above pH 9.0 or below pH 6.0 in any calendar month.
  2. Any pH reading that falls outside of the 6.0/9.0 limits must be reported monthly in a table showing compliance status with these duration and total time limits for pH exceedance. If a violation occurs, the permittee must provide notification to the Administrator within 24 hours of the violation.
  3. Every day that there is wastewater discharge a pH measurement of a grab sample of the wastewater treatment system effluent will be taken and recorded in the monthly report.
  4. The monthly report will show for every day of discharge a grab sample pH reading, a continuous maximum pH reading, and a continuous minimum pH reading.
- C.** A Specific Conductivity reading will be digitally recorded each minute of the day for the report period and retained for review of permit compliance status for 90 days.
1. A Specific Conductivity limit violation occurs if there is a discharge for more than 60 minutes continuously above the maximum limit or below the minimum limit or more than 7 hours and 26 minutes total time above the maximum limit or below the minimum limit in any calendar month. If a violation occurs, the permittee must provide notification to the Administrator within 4 hours of the violation.
  2. Any Specific Conductivity reading that falls outside of the min/max limits must be reported monthly in a table showing compliance status with these duration and total time limits for Specific Conductivity exceedance.
  3. Every week that there is wastewater discharge a Specific Conductivity measurement of a grab sample of the wastewater treatment system effluent will be taken and recorded in the monthly report.
  4. The monthly report will show the weekly grab sample TDS readings with time of collection and for every day of discharge a continuous average Specific Conductivity reading, a continuous maximum Specific Conductivity reading, and a continuous minimum Specific Conductivity reading.
  5. Specific Conductivity shall be temperature corrected to 25°C as under EPA Method 120.1
- D.** TTO sampling shall include all the compounds listed in 40 CFR 433.11(e) which are reasonably expected to be present in the wastewater. The compounds with quantifiable values greater than 0.01 mg/L shall be added together to determine the TTO concentration present in the discharge.

#### **E. Location of Sampling Points**

Samples shall be collected from the effluent of the wastewater pretreatment system (Outfall #1). Outfall #1 shall be designated according to the flow schematic and is located at the end of the regulated process (Effluent Tank).

All self-monitoring conducted by the Permittee in accordance with this permit and all regulatory sampling conducted by the City of Savannah shall be done at this point.

#### **F. Reporting**

Results of self-monitoring reports shall be submitted to the Administrator by the 15th of the month following sampling and shall be signed by the responsible official in charge with the following statement certifying the validity of the results:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

#### **G. Resampling**

If sampling or monitoring performed by the Permittee indicates a violation of the permit, the Permittee shall inform the Administrator within 24 hours of becoming aware of the violation. The Permittee shall also repeat the sampling and analysis and submit the results of the repeat analysis to the Administrator within 30 days after becoming aware of the violation. The Permittee is not required to resample if the City of Savannah samples between the Permittee's initial sampling and when the Permittee receives the results of this sampling.

#### **H. Monitoring Waivers for Pollutants Not Present under 40 CFR §122.44(a)(2)**

After the term of the first discharge permit, the Permittee may request a monitoring waiver from City of Savannah for pollutants not present or expected to be present in the discharge from Outfall #1. The Permittee must demonstrate through sampling and other technical factors that the pollutant is not present in the discharge or is present only at background levels from intake water and without any increase in the pollutant due to activities of the discharger.

**[2] Flow Calculations**

Reported flow calculations will be based on effluent wastewater and be reported in gallons per day. Flow meter readings will be taken daily and submitted monthly to the Administrator as required in Section [1]A of this permit. Field verification of the effluent flow meters shall be performed semiannually according to manufacturer's specifications and proof of verification submitted to the Administrator.

**[3] Slug Load Reporting and Treatment System Failure**

The Permittee will review the existing spill control plan for this facility to ensure the plan includes as a minimum the information required in the City's Pretreatment Ordinance, Section 5-2043 C. In the event of a major spill, dump, or unavoidable discharge at the Permittee's premises, sampling of the effluent shall begin immediately and continue until clean-up is completed. The Administrator shall be notified immediately of any such spill at (912) 651-6620 or 652-3808. Within five days following such discharge, the Permittee shall, unless waived by the Administrator, submit a detailed written report describing the cause(s) of the discharge and the measures to be taken by the Permittee to prevent similar future occurrences. Any bypass of the treatment system shall be prohibited except as allowed under the City's Pretreatment Ordinance. The spill control plan shall be updated on a biennial basis.

**[4] Required Effluent Reporting**

Within 30 days after effective date, samples representative of the effluent will be analyzed by the Permittee and this information furnished to the Administrator for all parameters included under Special Condition [1]A, except for a permit renewal if all sampling is current for the renewed permit. After this initial sampling, sampling will continue according to the schedule provided in Special Condition [1]A.

**[5] Surcharges**

The Permittee agrees to pay a surcharge for each unit of pollutants discharged in excess of the monthly average permitted in the City of Savannah Revenue Ordinance. Surcharges will be based on rates as established in the City of Savannah Revenue Ordinance. All other parameters shall not exceed the permit limits set forth by the City of Savannah. This surcharge shall not be a substitute for maintaining compliance with this Permit to Discharge Industrial Wastewater.

**[6] Permit Modification**

In the event the Georgia EPD or the EPA changes various standards, the changes will become a part of this agreement. The City may modify this permit when deemed necessary for good cause including, but not limited to, the following:

- A. To incorporate any new or revised Federal, State or local pretreatment standards or requirements.
- B. Material or substantial alterations or additions to the discharger's operation processes, or discharge volume or character which were not considered in drafting the effective permit.
- C. A change in any condition in either the Permittee or the Publicly Owned Treatment Works (POTW) that requires either a temporary or permanent reduction or elimination of the authorized discharge.
- D. Information indicating that the permitted discharge poses a threat to the Control Authority's (City of Savannah) collection and treatment systems, POTW personnel or the receiving waters.
- E. Violation of any terms or conditions of the permit.
- F. Misrepresentation or failure to disclose fully all relevant facts in the permit application or in any required reporting.
- G. Revision of a grant of variance from such categorical standards pursuant to 40 CFR 403.13.
- H. To correct typographical or other errors in the permit.
- I. To reflect transfer of the facility ownership and/or operation to a new owner/operator.
- J. Upon request of the Permittee, provided that such request does not create a violation of any applicable requirements, standards, laws, or rules and regulations.

**[7] Changes in Effluent**

In the event the Permittee should significantly expand its operations or business the Administrator must be notified before waste from the changes can be discharged into the City's sewer system. For purposes of this requirement, significant changes include, but are not limited to, a flow increase or decrease of 20 percent or more, and/or the discharge of any previously unreported pollutants. The Permittee shall notify the Administrator of the introduction of any new wastewater constituents or any increase in volume and/or characteristic of the wastewater effluent which may cause a violation of this permit. Each Permittee must notify the Administrator of any planned significant changes at least 90 days before the change.

**[8] Waste Disposal Reporting**

Twice a year, in January and July, the Permittee shall report to the Administrator the type, quantity, disposal site(s), transportation data and transporter of all liquid wastes, solid, sludge, filter backwash or other pollutants removed from its premises in the course of wastewater treatment during the previous six months. Excluded from this requirement are wastes removed by means of the City's sanitary sewer or trash disposal service.

**[9] Record Keeping**

The Permittee shall retain, and make available for inspection and copying, all records of information obtained pursuant to any monitoring activities required by this permit and any additional records of information obtained pursuant to monitoring activities undertaken by the Permittee independent of such requirements. Records shall include the date, exact place, method, and time of sampling, and the name of the person(s) taking the samples; the dates analyses were performed; who performed the analyses; the analytical techniques or methods used; and the results of such analyses. These records shall remain available for a period of at least three years. This period shall be automatically extended for the duration of any litigation concerning the Permittee or the City, or where the Permittee has been specifically notified of a longer retention period by the City of Savannah.

**[10] Applicable Penalties**

The City of Savannah retains all rights to relieve the Permittee of its Permit to Discharge Industrial Wastewater in the event it is deemed necessary to do so. The City, under the provisions of the Pretreatment Ordinance, shall notify the Permittee of any violation, whether significant or non-significant. In addition to various administrative penalties, the City may pursue civil penalties of up to \$1,000.00 per violation per day and criminal penalties of not more than \$1,000.00 per violation per day and/or imprisonment for not more than one year as specified in the Ordinance.

**[11] Confidential Information**

Information and data on a Permittee obtained from reports, questionnaires, permit applications, permit and monitoring programs, and from inspections shall be available to the public or other governmental agency without restriction unless the Permittee specifically requests and is able to demonstrate that such information would divulge information, processes or methods of production entitled to protection as trade secrets of the Permittee (Section 5-2047 of the Pretreatment Ordinance). However, public notification is warranted in the case of a significant violation of this permit and will be carried out through the proper media channel and will contain the name, nature of violation and time of violation of the industry involved.

**[12] Permit Transfer**

This Permit to Discharge Industrial Wastewater is issued to a specific Permittee for a specific operation. A request for transfer or reassignment shall be submitted in writing to the Administrator no less than 90 days prior to the proposed date of reassignment, transfer or sale by the Permittee. A permit shall not be reassigned, transferred, or sold to a new owner or Permittee without the written approval of the Administrator.

**[13] Compliance Schedule [Reserved]**

**[14] Direct Conditions**

- A. Provisions will be made to allow City of Savannah representatives access to the facility for the purposes of inspection, observation, measurement, sampling, copying of records, photographing, or testing.
- B. Damage to treatment works or injury to POTW personnel resulting from discharges from this facility will become the liability of the Permittee.
- C. All quarterly samples shall be collected no later than the months of March, June, September, and December.
- D. All semiannual samples and calibrations shall be collected no later than the months of June and December.
- E. The required sampling frequency will be based upon the development stage of the Plant – Startup, Baseline, and Established.

Baseline Period – Shall be a period of thirty (30) days following the City's approval to operate the industrial pretreatment system via this Permit. Discharge will be limited and monitored by the Permittee at a frequency of seven (7) times a week for BOD<sub>5</sub>, TSS, NH<sub>3</sub>, Cyanide, Phosphorus, and HEM. All other pollutants will be limited and monitored as stated in Section [1]A of this permit. COD shall be monitored continuously (1/minute). The purpose of the baseline stage will be to compile a comprehensive set of laboratory data for use and comparison by the City of Savannah and the Permittee in the subsequent stages of operation.

Startup Period – Shall be a period of no more than nine (9) months following completion of the Baseline Stage as described herein. Discharge will be limited and monitored by the Permittee once (1) a week for BOD<sub>5</sub>, TSS, NH<sub>3</sub>, Cyanide, Phosphorus, and HEM for comparison against the Baseline Stage data. COD sampling may be reduced to seven (7) times a week based on 30 days of prior data at the discretion of the Administrator. All other pollutants will be limited and monitored as stated in Section [1]A of this permit.

Established Period – Shall begin after the completion of Startup Period. COD sampling may be reduced to one (1) time a week based on 90 days of prior data at the discretion of the Administrator. All other pollutants will be limited and monitored as stated in Section [1]A of this permit.

- F. The Permittee shall maintain compliance with all Permit provisions at all times of system operation, and the Permittee shall ensure implementation of this Permit is consistent with the Bryan County Flow Management Plan related to sewer conveyance into the Savannah POTW. The City may suspend discharge of the facility's effluent to the City of Savannah sanitary sewer collection and conveyance system at any time if the permittee fails to maintain strict compliance with all provisions of this permit.

RE: City Response to CAP Submission on 10/4/2024

Ms. Press,

The purpose of this letter is to convey a formal response to HMGMA regarding the Corrective Action Plan (CAP) that HMGMA provided on 10/4/2024 pursuant to the 10/01/2024 Notice of Violation (NOV) on HMGMA Permit No. 20417-11. It is the position of the City of Savannah ("The City") that the CAP is **not accepted**, based on the specific issues detailed below. As the first step to resolve the NOV, HMGMA will need to resubmit a revised CAP for evaluation by the City including consideration of the following issues:

1. It is not acceptable to the City for the CAP to be submitted as a "draft." It must be submitted as a final, signed version including a cover letter with signature from a relevant responsible agent of HMGMA. The guideline for a successful CAP is to provide a list of actionable, measurable tasks that HMGMA is formally committing to completing.
2. The City does not concur with any representation put forth by HMGMA in the CAP that the existing TDS and/or specific conductivity permit conditions necessarily require removal of TDS. These conditions only require a management of the variability in TDS, which need not necessarily include removal. The city has provided HMGMA several opportunities, including another with this NOV, to offer an average TDS based on a mass balance evaluation of their process to guide where the range is centered. Furthermore, specific conductivity was added at the request of HMGMA, not the City, for clarification on the way TDS was to be measured through continuous monitoring. We would like the CAP to more accurately reflect these permit conditions and background.
3. The City would like the CAP to indicate that the City is the temporary recipient of HMGMA wastewater, and that acceptance of wastewater by the City will cease as soon as the Bryan County WWTP is operational.

4. The City would like the CAP to correctly indicate the timeframe for the Bryan County WWTP to be operational, which we understand to be less than one year, and likely less than 6 months.
5. It is not acceptable to the City that the contracted engineer provides anything less than a comprehensive evaluation and report of the pretreatment process for which they are willing to sign, seal, and take full responsibility for its conclusions. In response to the assertion that WHEE cannot serve as the engineer of record pursuant to “Georgia Professional Engineering Laws and Rules”, we cite Rule 180-6-.03. (4) and require as an amended minimum provision of the CAP that HMGMA obtain a “specialty engineer” rather than an “new engineer of record” who will provide a signed comprehensive report of its suitability to meet permit conditions. This review must include at minimum:
  - (1) Documentation and review of all constituents being processed by the system
  - (2) Documentation and review of the degree of ability of the pretreatment system to remove all constituents
  - (3) Documentation of either the suitability of the current system to meet permit conditions or necessary modifications to achieve consistent compliance.
6. The City does not agree with the description of the pretreatment permit as a “negotiation” and would like this language removed from the CAP. An unsigned version of the revised permit will be issued following the acceptance of a final CAP and will not change based on operational preferences, opinions, or cost considerations of the permittee. These permit conditions are based on a scientifically based and third party validated evaluation of risk to and protection of our WWTP. The only input from the permittee to the permit process is the required full disclosure of all wastewater constituents and the signed and stamped design documents and/or engineering review of the pretreatment process. The City would like to see this understanding of the permit process stated in the CAP.
7. It is not acceptable to the city that the CAP would cite an inability to provide a comprehensive review of the kind specifically required by the NOV based on,  
*“the various unknowns in pretreatment system design parameters, system construction/ operational status, discharge permitting negotiations and methods used to establish permit limits, and potential changes in design wastewater characteristics versus actual wastewater from the HMGMA plant.”*

This condition of uncertainty is exactly the reason why the review is required by the City as a minimum part of the CAP. As has been previously communicated, it is the position of the City that there is no opportunity for flexibility in discharge concentrations or permit compliance while the plant conditions develop, phase in, or ramp up. The permit, as issued, must be based on a completed analysis informing the pretreatment design and operation and its conditions must be met from first day to the last day of discharge. Necessary engineering work and communication between HMGMA manufacturing operation and wastewater pretreatment must be completed to remove these unknowns prior to further discharge to the City POTW. As to uncertainty in the permit conditions, as previously stated they are not negotiated and will be known to the engineer at the beginning of the CAP period. Furthermore, our pretreatment process requires that the characteristics of the wastewater are not to change in a way that adds to potential constituents or increases volume. If they do, notice must be given 90 days in advance for reevaluation and changes in permit conditions. In summary, the situation as described in the submitted CAP cannot be the case for a permitted discharge to the City POTW. The CAP, and

the pretreatment system design and operation, must be modified as needed to reflect these necessary conditions for discharge to the City POTW.

8. In further enhancement of the CAP relative to [7], it is the position of the city that the CAP would greatly benefit from a detailed description of the circumstances surrounding prior periods of noncompliance including a description of the influent wastewater conditions, accompanying pretreatment system operatorial parameters at the time, how the exceedance was first noticed, and actions that were taken in response to the observation of noncompliance. This description would create a benchmark of performance, a “floor”, that can be measured against for improvements steps moving forward. The CAP is a much more effective process in an environment of maximum transparency.
9. While even more system improvements may be needed, the city takes no exception with the proposed additions and system improvements stated in the last 5 pages of the CAP, including “attachment 2”, but these improvements need to be provided in a final form as firm action items to be completed in the CAP by HMGMA, not as “draft” or “TBD” items subject to change.
10. The provided schedule for the CAP, details as items 1-6, is not in alignment with the 30-day requirement in the NOV. Item 3 is only relevant to the mass balance determined average TDS value, which has already been provided in the CAP at 1,000mg/L. The 500 mg/L range is firm. There should not need to be a CAP action item to negotiate permit conditions with the City as item 3 seems to indicate. Items 4-6 should all be completed within 30 days as well. If they cannot be completed within 30 days, a plan must be included in the CAP to commence pump and haul as needed for material that is out of compliance if stated improvements are deemed necessary by the specialty engineer to meet permit conditions at all times.
11. Regarding needed process improvements, it should be anticipated that daily (1/d) composite and grab sampling will be required for additional parameters (including metals) in the modified permit and that sample results will need to be reported on a daily basis to the City within 24-48 hours of sampling. The CAP should include immediate steps evaluating options to provide this daily laboratory data along with continuous data in anticipation of compliance with the modified permit.
12. Overall, the CAP should clearly describe the steps that will result in measured improvement of the pretreatment system and increased confidence on the part of the administrator that the Permittee will be able to consistently meet the permit conditions going forward that were not met previously, resulting in the NOV. The city would like to see this more clearly stated in the CAP including enumerated action items with commitment to complete, measurable outcomes, and a deadline of 30 days or less.

Based on the information in this letter, the City envisions that the future steps related to this matter are generally as follows:

Phase 1 (CAP approval and EQ Tank Disposal)

- HMGMA will provide the City a revised CAP for review and approval
- HMGMA, Bryan County, and City of Savannah will determine the disposal options for the wastewater in the EQ tank based on adequate laboratory results

Phase 2 (CAP Implementation)

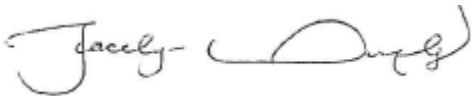

- Issuance of a modified pretreatment permit by City of Savannah to HMGMA
- If required based on system evaluation, HMGMA will implement an alternative system for disposal of industrial pretreatment wastewater until such time as CAP implementation is completed to enable permit compliant discharge to Bryan County and City of Savannah
- Completion of improvements by HMGMA to the industrial pretreatment facility in accordance with the approved CAP
- Recommencement of pretreated industrial discharge by HMGMA to Bryan County on a trial basis at a reduced maximum flow rate to establish compliance with the modified pretreatment permit and to evaluate pretreatment system performance
- Based on the results of the trial period exercise, consideration will be given regarding increase in maximum discharge flow rate by HMGMA to Bryan County

Phase 3 (Pretreatment System Operation under the Modified Permit)

- Ongoing monitoring and reporting by HMGMA to ensure compliance with the modified permit conditions.

Please contact the City of Savannah with any questions regarding the contents of this letter.

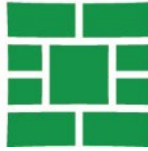

Sincerely,

A handwritten signature in dark ink, appearing to read "Jacelyn Crumley". The signature is fluid and cursive, with the first name "Jacelyn" being more prominent than the last name "Crumley".

RE: City Response to Revised CAP Submission on 10/23/2024

Ms. Press,

The purpose of this letter is to convey a formal response to HMGMA regarding the **Revised** Corrective Action Plan (CAP) that HMGMA provided on 10/23/2024 pursuant to the 10/01/2024 Notice of Violation (NOV) on HMGMA Permit No. 20417-11. It is the position of the City of Savannah ("The City") that the CAP is **conditionally approved**, pending written acceptance by HMGMA of the following specific additional requirements detailed below. As the next step to resolve the NOV, HMGMA will need to reply with acceptance of these additional specific requirements, then provide verification of the implementation of the CAP within 30 days. An unsigned copy of the modified industrial discharge permit is included in this correspondence and should be referenced in completion of the CAP.

Specific additional requirements based on our review of the revised CAP:

- Address all concerns raised by ChemTreat regarding sufficient mixing energy and mixing time in the system modifications by WHEE.
- Make any necessary adjustments to monitoring equipment and procedures to meet the reporting requirements and conditions of the modified permit including:
  - Flow-weighted composite sampling
  - Daily reporting of certain composite sample results within 24 hours of sample collection.
  - Daily transmission of continuous monitoring data
- Make any necessary adjustments to pre-treatment system to ensure that operators are immediately aware of problematic trends in system performance or non-compliant discharge and can take immediate actions to resolve performance or cease non-compliant discharge. This problematic trend monitoring should include any critical process identified by WHEE or ChemTreat in their analysis and recommendations.

- Update the City of Savannah on a weekly basis detailing progress regarding each element of the CAP
- Presence of a certified lab analyst or wastewater operator on site at HMGMA for the purposes of lab data and daily monitoring.

Based on the information in this letter, the City envisions that the future steps related to this matter are generally as follows:

Phase 1 (CAP approval and EQ Tank Disposal)

- HMGMA will provide the City a revised CAP for review and approval **(Completed)**
- HMGMA, in accordance with existing communication with Bryan County and City of Savannah, will complete disposal of the wastewater in the EQ tank given the test results that indicated that the wastewater was not compatible with the Travis Field WRF. **(In Process)**

Phase 2 (CAP Implementation)

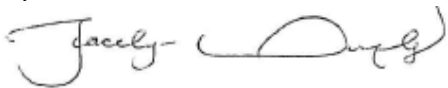

- Issuance of a modified pretreatment permit by City of Savannah to HMGMA **(Completed)**
- If required based on system evaluation, HMGMA will implement an alternative system for disposal of industrial pretreatment wastewater until such time as CAP implementation is completed to enable permit compliant discharge to Bryan County and City of Savannah
- Completion of improvements by HMGMA to the industrial pretreatment facility in accordance with the approved CAP
- Recommencement of pretreated industrial discharge by HMGMA to Bryan County on a trial basis at a reduced maximum flow rate to establish compliance with the modified pretreatment permit and to evaluate pretreatment system performance
- Based on the results of the trial period exercise, consideration will be given regarding the increase in maximum discharge flow rate by HMGMA to Bryan County

Phase 3 (Pretreatment System Operation under the Modified Permit)

- Ongoing monitoring and reporting by HMGMA to ensure compliance with the modified permit conditions.

Please contact the City of Savannah with any questions regarding the contents of this letter.

Sincerely,

Jacelyn Crumley, Director of Water Reclamation

City of Savannah Water Reclamation

Shawn Rosenquist, P.E. Senior Civil Engineer

## NOTICE OF VIOLATION

October 1, 2024

Mr. Mazen El-Jeaid  
Environmental Assistant Manager (EHS)  
Hyundai Motor Group Metaplant America, LLC.  
131 Hutchinson Island Road  
Savannah, GA 31421

RE: Violations in September 2024 for HMGMA Permit No. 20427-11

Dear Mr. El-Jeaid,

The purpose of this document is to provide formal notice to the Industrial Pretreatment Permittee (i.e. HMGMA) of documented violations of the Industrial Pretreatment Permit No. 20427-11 (the HMGMA Permit). In addition, this document describes further instances of non-compliance, observed impacts to the City of Savannah Travis Field Water Pollution Control Plant (the Travis Field WPCP), and necessary components of a corrective action plan (CAP) that HMGMA must undertake immediately. The specific HMGMA Permit violations and areas of non-compliance are listed in the tables below. It is the responsibility of HMGMA to ensure that the pretreatment facility complies with all the conditions of HMGMA Permit No. 20427-11 as well as the necessary corrective actions on the timelines noted within this notice in order to maintain an active permit. The protection of the City of Savannah Travis Field WPCP for all customers and in support of City of Savannah's Georgia EPD wastewater discharge permit (NPDES Permit No. GA0020427) is the priority.

HMGMA must respond acknowledging receipt of this notice in writing within 24 hours and with a detailed CAP within 3 business days. Full implementation of the CAP must be completed within 30 days of approval. An unsigned copy of the modified permit will be provided to HMGMA by City of Savannah following receipt of the CAP for your use in implementing the CAP thereby assuring the ability of the HMGMA industrial pre-treatment system to meet all the included conditions. Completion of the CAP will result in the issuance of a new, modified industrial pre-treatment permit to HMGMA.

It should be noted that the City of Savannah staff has compiled data from the operation of Travis Field WPCP indicating that the Total Phosphorus levels being discharged from the WPCP were trending upward since early September 2024 (see table below). NPDES Permit No. 0020427 contains a Total Phosphorus limit of 0.5 mg/L and the WPCP discharge data on 9/20/24 through 9/27/24 includes documented exceedances of 0.5 mg/L. It should also be noted that preliminary data from 9/27/24 and 9/30/24 indicates recovery of the phosphorus treatment process after HMGMA discharge was paused as of 9/27/24. The City of Savannah is still in the process of compiling additional data to determine if a NPDES Permit violation has occurred with respect to Total Phosphorus that would require notification to the Georgia EPD. Accordingly, the City of Savannah has requested supplemental discharge data from HMGMA via email on 9/30/24 to enable the City staff to more fully evaluate what additional actions (if any) may need to be implemented by the City to protect the operation of Travis Field WPCP and to ensure our ability to comply with NPDES Permit No. GA0020427. Further impacts to the Travis Field WPCP due to the failure of HMGMA to comply with Permit No. 20427-11 could result in the cessation of discharge.

**Documented Impact to Travis Field WPCP\***

Date	Total Phosphorus in Effluent (mg/L)	Notes
9/4/24	0.192	
9/5/24	0.207	
9/6/24	0.18	
9/9/24	0.176	
9/11/24	0.18	
9/13/24	0.382	
9/18/24	0.195	
9/20/24	0.752	
9/23/24	1.07	
9/25/24	2.18	Preliminary Data
9/27/24	1.25	Preliminary Data
9/30/24	0.427	Preliminary Data; Following pause in HMGMA discharge to WPCP as of 9/27/24.

\*Previous correspondence documents the connection between specific permit conditions and effective phosphorous treatment at the Travis Field WPCP.

The table below details the specific HMGMA permit violations that are documented to have occurred during September 2024.

**Specific Permit Violations**

No.	Date	Permit/Ordinance Condition	Permit Violation
1.	9/17/2024	Copper: 0.14 mg/L ( <b>140 µg/L</b> )	911 µg/L
2.	9/17/2024	Zinc: 0.274 mg/L ( <b>274 µg/L</b> )	591 µg/L
3.	9/10/2024 16:45 to 9/11/2024 11:56 HRS	Conductivity Data Log	No Data: Continuous Monitoring

The table below details additional HMGMA permit non-compliance (exceedance) that are documented to have occurred during September 2024.

**Additional Areas of Noncompliance**

No.	Date	Permit/Ordinance Condition	Permit Violation
1.	9/5/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	858 mg/L.
2.	9/6/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	820 mg/L.
3.	9/9/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	877 mg/L.
4.	9/10/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	899 mg/L.
5.	9/11/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	1,260 mg/L.
6.	9/13/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	1,310 mg/L.
7.	9/16/2024	Maximum Daily Limit Total Dissolved Solids: 800 mg/L	875 mg/L.
8.	9/9/2024	Maximum Daily Limit pH: 9	9.77
9.	9/5/2024 to 9/16/2024	Maximum Daily Limit SpCond: 1280 uS/m	Multiple Exceedances in Continuous Monitoring
10.	9/5/2024 to 9/11/2024	Maximum Daily Limit COD: 500mg/L	Multiple Exceedances in Continuous Monitoring

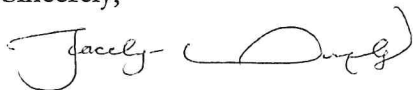

### **Necessary Components of a Corrective Action Plan (CAP)**

The following are minimum necessary components of the CAP to be submitted by HMGMA to the City of Savannah within 3 business days of receipt of this NOV via email. These components, along with the rest of the plan developed by HMGMA, must be approved by City of Savannah and completed within 30 days of approval.

1. A new engineer of record (EOR) must be established for the HMGMA pretreatment system and provide a signed comprehensive review of its suitability to meet permit conditions. This review must include at minimum:
  - a. Documentation and review of all constituents being processed by the system
  - b. Documentation and review of the degree of ability of the pretreatment system to remove all constituents
  - c. Documentation of either the suitability of the current system to meet permit conditions or necessary modifications to achieve consistent compliance.
2. The new operations contactor must provide a thorough review of standard operating procedures. This review must include at a minimum:
  - a. Documentation and review of operational, monitoring, and sampling protocols
  - b. Establishment of enhanced error-proofing steps in process control, sampling adherence, and immediate reporting of non-compliant conditions for continuous monitoring constituents
  - c. Quality Assurance-Quality Control Plan for operation, sampling, and in-house laboratory analysis of permitted parameters.
3. Mass balance analysis of TDS in the pretreatment process toward the development of an appropriate average TDS, with a 500mg/L range, in a modified permit.
4. Appropriate modification to Sampling, Monitoring, and Operator interface components to allow for <4-hour notification to the City of Savannah of constituent exceedance(s), operator alarms on constituent exceedance(s) or critical process constituents, delivery of requested continuous data within 24 hours, and flow-triggered composite sampling, all in support of a modified permit.

Please contact the City of Savannah staff regarding any questions regarding the contents of this letter.

Sincerely,

Jacelyn Crumley, Director of Water Reclamation  
City of Savannah Water Reclamation

**Re: Draft Preliminary Wastewater Pretreatment System Evaluation and Draft  
Corrective Action Plan (CAP)  
HMG Metaplant America Georgia Automobile Manufacturing Plant  
Ellabell, Georgia Plant  
Industrial Pretreatment Permit No. 20427-11  
WHEE Proposal No.: 24115**

Dear Ms. Crumley:

Woodruff & Howe Environmental Engineering, Inc. (WHEE) hereby submits this draft Corrective Action Plan (CAP) to Inframark Water & Infrastructure Services (Inframark) for the wastewater pretreatment system at the Hyundai Motor Group Metaplant America (HMGMA) automobile manufacturing plant in Ellabell, Georgia, which is in Bryan County. The proposed scope of work also includes a preliminary wastewater pretreatment system evaluation of the pretreatment system. This draft document is being submitted to meet the Corrective Action Plan (CAP) requirement indicated in the Notice of Violation (NOV) issued to the HMGMA plant.

## **BACKGROUND**

HMGMA has constructed a new automobile manufacturing plant in Ellabell, Georgia. Construction of this plant is nearing completion, and limited automobile manufacturing operations have begun at the facility. Wastewater from manufacturing and other ancillary operations is being pretreated in an onsite 0.400 MGD chemical-physical pretreatment system designed and constructed by others. The wastewater pretreatment system is operated by Inframark Water & Infrastructure Services (Inframark). Wastewater is discharged to the Bryan County wastewater collection system and conveyed to an equalization tank owned and operated by Bryan County and then subsequently conveyed to the City of Savannah's Travis Field Water Reclamation Plant for final treatment and disposal. The City of Savannah issued an industrial pretreatment permit, Permit No. 20427-11 (Permit), for the discharge pretreated process wastewater to their wastewater treatment system. This permit includes limits for various pollutants including conventional

pollutants, heavy metals, total toxic organics (TTO), TDS, and specific conductivity. We understand that specific conductivity and TDS parameters were added to the final Permit near the end of the permitting process. We further understand the pretreatment system may not have been designed to remove specific conductivity or TDS from the wastewater, and the water treatment chemicals required to meet discharge limits for heavy metals and other pollutants are adding TDS and specific conductivity to the wastewater which is contributing to reported exceedances of the associated discharge limits for these parameters. The City of Savannah has issued the HMGMA plant a Notice of Violation (NOV) for exceedances of discharge limits for copper, zinc, TDS, conductivity, pH, and COD. The City of Savannah also alleges discharges from the HMGMA plant are contributing to adverse impacts on the City's wastewater treatment plant and violations of its NPDES Permit limits for total phosphorous (TP). It is our understanding Bryan County is constructing a new municipal wastewater treatment plant (WWTP) that will provide treatment and disposal of wastewater from the HMGMA plant, but this new WWTP will not come online for at least another year.

In the NOV, the City of Savannah is requiring development of a corrective action plan (CAP) to address/correct the alleged noncompliance issues and bring the facility into compliance with discharge limits and development of new standard operating procedures. This draft document is intended to meet the CAP requirement.

WHEE cannot accept responsibility for being the new EOR for the pretreatment system given current conditions and the various unknowns in pretreatment system design parameters, system construction/operational status, discharge permitting negotiations and methods used to establish Permit limits, and potential changes in design wastewater characteristics versus actual wastewater quality from the HMGMA plant. Also, Georgia Professional Engineering laws and rules prevent a Professional Engineer from taking ownership of, responsibility for, credit for, etc. engineering design work prepared by another Professional Engineer.

#### **Preliminary Pretreatment System Review and Corrective Action Plan (CAP)**

The proposed scope of work for the proposed preliminary pretreatment system review and CAP is anticipated to include the following elements:

- ✓ Review available information on system design and operational parameters.
- ✓ Review current wastewater pretreatment system operations.
- ✓ Review design and actual current wastewater characteristics.
- ✓ Review available wastewater pretreatment permitting information and communications with the City of Savannah, Georgia EPD, and other applicable parties (Bryan County officials, Thomas & Hutton, State and Local economic development officials, and others) to understand the history of the project related to wastewater pretreatment and associated permitting.
- ✓ Review available influent and effluent monitoring data and internal process control monitoring data.
- ✓ Review control system design parameters and monitoring and control equipment.

- ✓ Review wastewater pretreatment chemical program(s) assumed for system design purposes, actual program(s) required based on current wastewater characteristics, and potential changes needed to enhance pollutant removal. This element would include meetings/correspondence with ChemTreat.
- ✓ Conduct a site visit(s) to review plant production operations and wastewater source streams, wastewater pretreatment system design and operations, and chemical treatment program. Potential options for pollution prevention within the HMGMA plant will also be reviewed.
- ✓ Meet with City of Savannah POTW officials to discuss pretreatment system permitting history, POW issues of concern, basis for discharge limits in the current Permit, potential changes in pretreatment Permit limits, CAP scope, etc.
- ✓ Develop a preliminary letter report summarizing our findings and recommendations. We anticipate this report will discuss short-term, medium-term, and long-term corrective actions. Both physical and operational changes to the pretreatment system will be considered.
- ✓ As applicable, conduct onsite wastewater testing of the various wastewater streams for conductivity using handheld instrumentation as well as dilution studies to better understand the strength of the wastewater streams with respect to conductivity and TDS.
- ✓ Assist Inframark in the review of current standard operating procedures (SOPs) for the pretreatment system and development of new SOPs, as applicable.
- ✓ Provide other services as directed by Inframark.

The following schedules are proposed for the CAP:

- 1) Completion of preliminary engineering review and reporting of findings – *Within thirty (30) days of receiving formal authorization to proceed and approval of final CAP by the City of Savannah.*
- 2) Completion of a review of current standard operating procedures (SOPs) for the pretreatment system and development of new SOPs, as applicable – *Within thirty (30) days of receiving formal authorization to proceed and approval of final CAP by the City of Savannah.*
- 3) Work with City of Savannah to identify if any changes in permit limitations for specific conductivity and TDS can be secured - *Within sixty (60) days of receiving formal authorization to proceed and approval of final CAP by the City of Savannah.*
- 4) Implementation of short-term corrective actions that would include operational changes in the pretreatment system, changes in chemical treatment program, potential pollution prevention actions, etc. (does not any significant physical changes) – *Within six (6) months of receiving formal authorization to proceed and approval of final CAP by the City of Savannah.*

- 5) Preliminary evaluation and design of medium-term and long-term upgrades to the pretreatment system, as applicable. Potential use of rental wastewater treatment systems will be considered - *Within three (3) months of receiving formal authorization to proceed and approval of final CAP by the City of Savannah.*
- 6) As applicable, design, budgeting, and construction of any physical upgrades to the pretreatment system – *Schedule to be determined after completion of item 5.*

### **Project Team**

The project team will include Mr. Steven Woodruff, P.E., Mr. Warren Howe, P.E., other applicable WHEE engineers, and WHEE partners. Resumes for Mr. Woodruff and Mr. Howe are attached. Attached is a Wastewater Treatment Design and Evaluation SOQ for WHEE.

Please feel free to contact me at (770) 844-0037 or at [swoodruff@wheeinc.com](mailto:swoodruff@wheeinc.com) if should you have any questions on this proposed preliminary pretreatment system review and Corrective Action Plan.

Sincerely,

Woodruff & Howe Environmental Engineering, Inc.

Steven R. Woodruff, P.E.  
President

## STEVEN R. WOODRUFF, P.E.

### EDUCATION:

Bachelor of Science (B.S.) in Chemical Engineering, University of South Florida, 1987

### PROFESSIONAL ASSOCIATIONS & CERTIFICATIONS

Registered Professional Engineer: AL, CA, FL, GA, IA, LA, KY, ME, MS, NE, NC, NJ, OH, SC, TN, TX, and VA

Certified Comprehensive Nutrient Management Plan Writer in Tennessee including "Manure and Wastewater Handling and Storage Specialist Certification," "Nutrient Management Specialist Certification," and "Land Treatment Specialist Certification" Elements

Member of American Institute of Chemical Engineers (AIChE)

Member of American Consulting Engineering Council (ACEC) and ACEC of Georgia

Member of Water Environment Federation (WEF)

Member WEF Water Reuse Committee

Member of the American Water Works Association (AWWA)

Registered Soil Classifier for the siting and design of Onsite Sewage Disposal Systems (OSDSs) in Georgia

### PROFESSIONAL EXPERIENCE:

9/00 – Present

**WOODRUFF & HOWE ENVIRONMENTAL ENGINEERING, INC.,**  
4405 Canton Highway, Suite 100, Cumming, Georgia 30040, (770) 844-0037

#### **PRESIDENT & CEO:**

Performance of various engineering functions related to wastewater treatment system design, operation and troubleshooting and other environmental engineering functions on projects completed for various clients. Also, general managerial oversight of company operations, project management, sales and marketing, and oversight of company financial records and documents. WHEE specializes in water and wastewater treatment system design, water reclamation and reuse, evaluation and troubleshooting of pollution control systems and environmental regulatory issues for food and agriculture industries, municipalities and retail, commercial and residential customers. Some examples include:

- Evaluation, design and troubleshooting for various pretreatment and full treatment systems for poultry, red meat, pork, seafood (fish, alligator, squid, etc.), fruit and vegetable (leafy greens, peanuts), and further processing plants for a wide range of food products (margarine, snack foods, peanut butter and jelly sandwiches, alt meat products, egg products and byproducts, etc.). Technologies have included chemical/physical treatment systems (screening, DAF, filtration, metal precipitation, pH neutralization, etc.), biological treatment systems (anaerobic, aerobic, and anoxic processes), membrane-based treatment systems, land treatment systems (LAS), activated carbon and ion exchange (IX) treatment systems, disinfection systems, advanced chemical oxidation systems, and other treatment technologies.
- Evaluation and design and other technical services for food processing plants, animal feed production plants, byproducts processing plants and fertilizer and soil amendment processing plants. Services include air pollution control system evaluation, design, and troubleshooting.

- Evaluation, design of new wastewater treatment systems and/or operational improvements to address food safety intervention chemicals, sanitation chemicals, and other chemicals/materials used in food, feed, and agricultural products processing operations.
- Evaluation, design and troubleshooting of storm water treatment system for food and feed processing plants and chemical production plants for removal of TSS, fecal coliform/E coli., BOD, COD, ammonia-nitrogen, phosphorus, and other pollutants. Also, development of storm water pollution prevention programs and best management practices specific to food, feed, and byproduct processing operations.
- Evaluation and design of water conservation, recycling and reuse systems for various industries including food and feed processing plants.
- Evaluation, preliminary design, and capital budgeting of wastewater treatment systems for removal of selenium, metals and nutrients from kaolin mining and ore processing facilities and metal processing and plating operations.
- Advising upper management with various companies and industries on environmental compliance issues, including mergers, acquisitions, new plant siting, plant sales, and due diligence related to environmental and compliance issues.
- Development of various environmental regulatory permit applications, plans, programs, regulatory reporting, and associated engineering reports for compliance with Federal, State and Local requirements. Also, performance of negotiations with regulatory agencies and third parties (NGOs) over permit limits, terms, and conditions, and providing technical support, including expert witness testimony for resolution of legal cases related to non-compliance issues or legal challenges to new environmental permits. We commonly provide technical support to attorneys on environmental issues.
- Environmental regulatory compliance auditing and development of sustainability program information.
- Performance of various investigations and business risk reviews related to Per- and Polyfluoroalkyl Substances (PFAS).

7/92-8/00

**GOLD KIST INC., 244 Perimeter Center Parkway, N.E.  
Atlanta, Georgia 30346, (770) 393-5203**

**DIRECTOR, ENVIRONMENTAL ENGINEERING AND SAFETY:**

Overall corporate responsibility for environmental, safety and fleet management programs in Gold Kist, a \$1.5 billion dollar per year company with poultry processing plants, feed mills, hatcheries, and other agricultural related operations. The company conducted business in more than ten states with the number of individual facilities exceeding 100. Specific responsibilities and experience included the following:

- Director of Corporate Environmental Engineering and Safety Department responsible for direct management of corporate environmental, safety, and fleet management staff and indirect management of key facility personnel responsible for implementation of environmental, health and safety and fleet management programs at the facility level.
- Key person responsible for advising the company's board of directors, chief executives, vice presidents, facility managers and other applicable personnel on regulatory issues as well as assessing financial and operational impacts of applicable regulations. This responsibility includes preparing the annual environmental and safety report for the company.
- Development and implementation of regulatory compliance programs within the company and subsidiary companies.

- Regulatory correspondence and negotiations related to NPDES permits, indirect discharge permits, air permits, RCRA issues, CERCLA issues, SPCC issues, UST issues, and all other federal, state, and local environmental regulations impacting company operations.
- Design, cost estimating and construction of wastewater treatment systems, air pollution control systems, and other pollution control systems, including scrubber system for ammonia removal and recovery for mobile T reactor (unit manufactured ammonium polyphosphate solution – 10-34-0)
- Development and implementation of regulatory training programs, environmental audit programs, and other proactive compliance and environmental stewardship programs.
- Design and project management related to construction and installation of water treatment and reuse systems.

12/87-7/92

**LAW ENVIRONMENTAL, INC., 112 Townpark Drive, Kennesaw, GA, 30144  
(770) 421-3400**

**DEPARTMENT MANAGER/PROJECT MANAGER/PROCESS CHEMICAL ENGINEER:** While working at Law Environmental worked in a variety of areas within the Environmental and Process Engineering fields. Responsibilities and experience included the following:

- Process design and optimization of water and wastewater treatment systems.
- Design of ground water and soil remediation systems. Experience includes air strippers, steam strippers, UV-Chemical Oxidation systems, carbon absorption, biological treatment systems, metals removal systems, and soil vapor extraction systems.
- Evaluation and design of air emission control equipment. Experience included absorbers, incinerators, condensers, and regenerative carbon absorption systems.
- Chief Process Engineer and Task Manager in the design, permitting and construction of regional plants for processing/recycling plastics. Responsibilities for this project included: process design, including water treatment and reuse systems; equipment development, evaluation and selection; completion of air and wastewater discharge permit applications; and supervision of construction activities. Also supervised meetings with industrial executives and local and state environmental regulatory representatives concerning siting of processing facilities.
- Evaluation and design of water treatment systems and programs related to drinking water quality. Experience includes performance of various studies related to elevated lead, copper, zinc and other pollutants in drinking and process water distribution/supply systems in commercial buildings, residential structures, food processing plants, and other industrial and manufacturing plants.

**FIELD INSPECTOR/TECHNICIAN:** Supervised construction of sanitary collection systems and potable water distribution systems and aided in the design of municipal wastewater treatment systems and potable water treatment systems.

### **OTHER AFFILIATIONS, AWARDS AND ACCOMPLISHMENTS**

- ✓ Former Member of the Board for the Georgia Department of Natural Resources (GDNR) and Former Vice Chairman of Environmental Protection Committee.
- ✓ Former Member of the Governing Board and Executive Committee for the Metropolitan North Georgia Water Planning District.
- ✓ Former Member of Board of Directors for the Cherokee County Water & Sewerage Authority (CCWSA).
- ✓ Past Chairman and Steering Committee Member on the Georgia Industry Environmental Coalition; Past Chairman of the Environmental Technical Committee and Steering Committee Member on Georgia's Traditional Industries Program for Food Processing.
- ✓ Member of US Poultry & Egg Association's Research Advisory Council (RAC).
- ✓ Member U.S. EPA Small Business Advocacy Review Panel for the 2023 Meat and Poultry Products (MPP) Effluent Limitation Guidelines (ELGs) rulemaking process.
- ✓ Executive Committee Member, Board Member and Past Chairman of the Georgia Agribusiness Council (GAC).
- ✓ Completion of Texas A&M University "*Practical Short Course on Membrane & Separations Technology: Fundamentals, New Developments Applications & Daily Pilot Plant Demonstration*," April 2-6, 2006.
- ✓ Technical advisor for multi-party settlement negotiations over Georgia's NPDES General Permit for Storm Water Discharges Associated with Industrial Activity. Mr. Woodruff's focus was on the development of benchmark values for various pollutants, including fecal coliform, for industrial storm water discharges to "Impaired Stream Segments," and development of "*Storm Water Pollution Prevention Best Management Practices for Fecal Coliform Control at Animal Processing Plants*," which was included in the final NPDES General Permit No. GAR000000 issued by the Georgia Environmental Protection Division (GEPD) in 2006.
- ✓ Former Member of Board of Directors for Terra Renewal Services (TRS), a residuals management company.
- ✓ Former Member of US Poultry & Egg Association's Poultry Protein & Fat Council, Subcommittee on Technology.
- ✓ Issued U.S. Patent No. US 6,464,875 B1 – Food, Animal, Vegetable and Food Preparation Byproduct Treatment Apparatus and Process.
- ✓ Committee member on the Georgia's Drought Management Planning Committee – Agriculture Committee.
- ✓ Committee Chairman or member on various other groups for environmental and water quality protection initiatives within the food, agriculture and manufacturing industries.

### Subject: On-line Effluent Monitoring Equipment

This procedure pertains to the operation and maintenance of the on-line monitoring instrument for COD, pH, and Conductivity for the effluent discharge from the wastewater treatment plant to the City of Savannah.

### Attachment:

Sincerely yours,

## **On-line Effluent Monitoring Equipment Operations and Maintenance**

### **1. Purpose**

This procedure outlines the steps necessary to provide the operations staff with the proper procedure for the operation and maintenance of the Yellow Springs Instrument IQ Sensor Net 2020 3G controller.

### **2. Scope**

This procedure applies to operations within the wastewater treatment plant's effluent discharge.

### **3. Responsibilities**

- **Wastewater Supervisor:** Overall responsibility for compliance and oversight of operations.
- **Operations Staff:** Daily monitoring and reporting of and quality metrics.
- **Wastewater Operator:** Ensures adherence to regulatory standards and conducts audits.
- **Maintenance Personnel:** Responsible for the upkeep of equipment related to flow and quality monitoring.
- **HMGMA EHS:** Liaison between operations team and regulators for operational compliance reporting.

### **4. Procedure Steps**

#### **4.1 Regulatory Review**

- **Frequency:** Annually or when regulations change.
- **Action:** Review all applicable federal, state, and local regulations related to effluent flow volumes and quality limits. Update internal policies as necessary.

#### **4.2 Monitoring and Measurement**

- **Effluent Quality Monitoring:**

---

**Hyundai ENG America, INC.**

Head Office: 111 Peters Canyon Rd., Irvine, CA 92606 USA  
Site Office: Bryan County Magistrate, Ellabell, GA 31308 USA

---

- Perform routine sampling and analysis of effluent for key parameters (e.g., COD, pH, and Conductivity) using the laboratory instruments for verification of on-line instrument results.
- Follow a defined sampling schedule of every (2) hours for Conductivity and pH, with COD every (12) hours.
- Maintain instrument per manufacturer specifications
- Calibrations must be performed weekly.

**4.3 Data Management**

- **Logging:**
  - Document all quality measurements on supplied forms for entry into a centralized database.
  - Maintain historical records for at least five years or as required by regulations.
- **Reporting:**
  - Generate monthly compliance reports detailing quality metrics, and any exceedances.
  - Submit required reports to Hyundai EHS personnel.

**4.4 Operational Adjustments**

- **Flow Management:**
  - Develop standard operating procedures (SOPs) for adjusting treatment processes based on flow variations (e.g., increased aeration for higher flows).
  - Implement flow diversion strategies during peak inflow events, including temporary storage solutions.
- **Quality Management:**
  - Adjust chemical dosing or operational parameters based on effluent quality monitoring results to remain within limits.

**4.5 Preventative Maintenance**

- **Schedule:** A routine maintenance schedule will be implemented for all monitoring and treatment equipment.

---

**Hyundai ENG America, INC.**

Head Office: 111 Peters Canyon Rd., Irvine, CA 92606 USA  
Site Office: Bryan County Megasite, Etahel, GA 31302 USA

---

- **Equipment Checks:** Conduct regular inspections and calibration of flow and quality monitoring devices to ensure accurate readings.

#### **4.6 Training and Awareness**

- **Training Programs:** Conduct quarterly training sessions for all staff on compliance requirements, monitoring procedures, and emergency response.
- **Documentation:** Maintain training records for all personnel.

#### **4.7 Emergency Procedures**

- **Exceedance Protocols:** Develop specific procedures for responding to exceedances effluent quality.
  - Notify the EHS Representative immediately of parameter exceedances.
  - Document the incident, including root cause analysis and corrective actions taken.

#### **4.8 Continuous Improvement**

- **Review Process:** Conduct quarterly reviews of compliance metrics and procedures to identify opportunities for improvement.
- **Stakeholder Engagement:** Hold annual meetings with stakeholders to discuss compliance performance and solicit feedback.

### **5. Records Management**

- Maintain all records related to quality testing, training, and compliance audits in accordance with regulatory requirements.

### **6. Review and Revision**

- This procedure shall be reviewed annually or when significant operational changes occur. Updates shall be made as necessary to ensure continued compliance.

**Hyundai ENG America, INC.**

Head Office 111 Peters Canyon Rd., Irvine, CA 92606, USA  
Site Office Bryan County MegaSite, Ellettsville, GA 31106, USA

---

**Conclusion**

This compliance procedure establishes a clear framework for managing effluent quality, ensuring that the wastewater treatment plant meets regulatory requirements and minimizes environmental impact. Regular monitoring, maintenance, and staff training are critical components of this procedure.

## **Compliance Procedure for Wastewater Treatment Plant Data Collection/Documentation**

### **1. Purpose**

This procedure outlines the steps necessary to ensure proper control of daily operations logging and data collection.

### **2. Scope**

This procedure applies to all operations within the wastewater treatment plant, including influent monitoring, treatment processes, and effluent discharge.

### **3. Responsibilities**

- **Wastewater Supervisor:** Overall responsibility for compliance and oversight of operations.
- **Operations Staff:** Daily monitoring and reporting of flow and quality metrics.
- **Wastewater Operator:** Ensures adherence to regulatory standards and conducts audits.
- **Maintenance Personnel:** Responsible for the upkeep of equipment related to flow and quality monitoring.
- **HMGMA EHS:** Liaison between operations team and regulators for operational compliance reporting.

### **4. Procedure Steps**

#### **4.1 Regulatory Review**

- **Frequency:** Annually or when regulations change.
- **Action:** Review all applicable federal, state, and local regulations related to effluent flow volumes and quality limits. Update internal policies as necessary.

#### **4.2 Monitoring and Measurement**

- All data and operating conditions must be documented in the wastewater treatment plant's operations logbook and round sheets.

---

**Hyundai ENG America, INC.**

Head Office: 111 Peters Canyon Rd., Irvine, CA 92606, USA  
Site Office: Bryan County MegaSite, Ellettsville, GA 31302, USA

---

- Logbook will be located on the operator's desk located in the lab of the plant, and is to be returned to this location.
- All entries into the log book are to be completed neatly and legibly
- All entries into the log book are to be completed in blue, black, pen only. red pen is to be used only when described in this policy
- Log book is not to be near any liquid at any time
- Front page of the log book will contain all data required for equipment information
- Whenever any of the equipment listed on the front page of the log book is replaced, repaired, or serviced the page must be updated
- All data in log is to be printed neatly
- The entire data page for the day is to be completed daily no blanks are permitted.
  - N/A = not applicable
  - X = in use, operational, or ok
  - O/L = off line
- The back of each data page is for operators notes this is to include the following
  - Note any repairs made to any equipment
  - Note any process changes "in red pen"
  - Note any special events, situations in the facility or system. Such as.
    - Water main break "location and description service disruption time and number of customers"
    - Hydrant flushing "locations"
    - Collection system jetting / cleaning
  - At the end of the entry the operator entering the data is to initial
- No pages are to be removed from the book at any time
- No correction fluids or tape to be used in the book at any time
- Any corrections will show a single line through the error followed by the persons initials and the corrected data
- No adding of any pages
- No tape or staples
- In the event of additional data required the log will show " more data in file with its location"

---

- Page is to be marked with a book marker no paper clips or pens are to be used to mark the page

**4.3 Data Management**

- **Logging:**
  - Document all flow and quality measurements in a supplied forms for entry into centralized database.
  - Maintain historical records for at least five years or as required by regulations.
- **Reporting:**
  - Generate monthly compliance reports detailing flow volumes, quality metrics, and any exceedances.
  - Submit required reports to regulatory authorities on time.

**4.4 Operational Adjustments**

- **Data Management:**
  - Develop standard operating procedures (SOPs) for improving data collection and documentation
- **Quality Management:**
  - Review data collection and documentation procedures to ensure operational parameters results to remain within limits.

**4.5 Training and Awareness**

- **Training Programs:** Conduct quarterly training sessions for all staff on compliance requirements and monitoring procedures
- **Documentation:** Maintain training records for all personnel.

**4.7 Emergency Procedures**

- **Exceedance Protocols:** Develop specific procedures for responding to data collection and documentation.
  - Notify the EHS Representative immediately of data collection/documentation issues.

**Subject: Compliance Assurance Procedure**

The following plan identifies the procedure for assuring compliance with effluent water quality and permit parameters.

- Flow 400,000 GPD daily limit
- Wastewater Effluent Parameters – Section 1.A of City of Savannah Permit

*If out of range with the above parameters, the plant effluent pumps discharging to the City Sanitary Sewer needs shall be stopped and wastewater recirculated back to the EQ tank until permit conditions are acceptable.*

## **Compliance Procedure for Wastewater Treatment Plant**

### **1. Purpose**

This procedure outlines the steps necessary to ensure compliance with effluent flow volume requirements and effluent quality limits established by regulatory authorities.

### **2. Scope**

This procedure applies to all operations within the wastewater treatment plant, including influent monitoring, treatment processes, and effluent discharge.

### **3. Responsibilities**

- **Wastewater Supervisor:** Overall responsibility for compliance and oversight of operations.
- **Operations Staff:** Daily monitoring and reporting of flow and quality metrics.
- **Wastewater Operator:** Ensures adherence to regulatory standards and conducts audits.
- **Maintenance Personnel:** Responsible for the upkeep of equipment related to flow and quality monitoring.
- **HMGMA EHS:** Liaison between operations team and regulators for operational compliance reporting.

### **4. Procedure Steps**

#### **4.1 Regulatory Review**

- **Frequency:** Annually or when regulations change.
- **Action:** Review all applicable federal, state, and local regulations related to effluent flow volumes and quality limits. Update internal policies as necessary.

#### **4.2 Monitoring and Measurement**

- **Flow Monitoring:**
  - Install and maintain calibrated flow meters at key points (influent, treatment stages, effluent).

---

**Hyundai ENG America, INC.**

Head Office 111 Peters Canyon Rd., Irvine, CA 92606 USA  
Site Office Bryan County Magistrate Building, GA 31506 USA

---

- Ensure real-time data logging through a SCADA system.
  - Conduct daily manual checks of flow meters to verify accuracy.
- **Effluent Quality Monitoring:**
  - Perform routine sampling and analysis for the following constituents:
    - Zinc
    - Copper
    - Conductivity
    - TDS
    - pH
    - COD
    - Phosphorus
  - Follow a defined sampling schedule of the following:
    - TDS, uS, pH, Zn, Cu – Every (2) hours while discharging
    - COD – Every (6) hours while discharging

**4.3 Data Management**

- **Logging:**
  - Document all flow and quality measurements in a centralized database.
  - Maintain historical records for at least five years or as required by regulations.
- **Reporting:**
  - Generate monthly compliance reports detailing flow volumes, quality metrics, and any exceedances.
  - Submit required reports to regulatory authorities on time.

**4.4 Operational Adjustments**

- **Flow Management:**
  - Develop standard operating procedures (SOPs) for adjusting treatment processes based on flow variations (e.g., increased aeration for higher flows).
  - Implement flow diversion strategies during peak inflow events, including temporary storage solutions.

Site Office : Bryan County Wastewater Treatment Plant, Ellettsville, GA 31708 USA

---

- **Quality Management:**

- Adjust chemical dosing or operational parameters based on effluent quality monitoring results to remain within limits.

#### 4.5 Preventative Maintenance

- **Schedule:** Implement a routine maintenance schedule for all monitoring and treatment equipment.
- **Equipment Checks:** Conduct regular inspections and calibration of flow and quality monitoring devices to ensure accurate readings.

#### 4.6 Training and Awareness

- **Training Programs:** Conduct quarterly training sessions for all staff on compliance requirements, monitoring procedures, and emergency response.
- **Documentation:** Maintain training records for all personnel.

#### 4.7 Emergency Procedures

- **Exceedance Protocols:** Develop specific procedures for responding to exceedances in flow volume or effluent quality.
  - Notify the Wastewater Supervisor and HMGMA EHS immediately.
  - Document the incident, including root cause analysis and corrective actions taken.

#### 4.8 Continuous Improvement

- **Review Process:** Conduct quarterly reviews of compliance metrics and procedures to identify opportunities for improvement.
- **Stakeholder Engagement:** Hold annual meetings with stakeholders to discuss compliance performance and solicit feedback.

---

**Hyundai ENG America, INC.**

Head Office: 111 Peters Canyon Rd., Irvine, CA 92616, USA  
Site Office: Bryan County, Megasre, Ellicott, GA 31308, USA

---

**5. Records Management**

- Maintain all records related to flow monitoring, quality testing, training, and compliance audits in accordance with regulatory requirements.

**6. Review and Revision**

- This procedure shall be reviewed annually or when significant operational changes occur. Updates shall be made as necessary to ensure continued compliance.

**Conclusion**

This compliance procedure establishes a clear framework for managing effluent flow volumes and quality, ensuring that the wastewater treatment plant meets regulatory requirements and minimizes environmental impact. Regular monitoring, maintenance, and staff training are critical components of this procedure.

## Memorandum

**DATE:** October 4, 2024  
**TO:** Chris Johns, HEAFM  
**FROM:** Mitch Brown, Inframark  
**SUBJECT:** Operations Protocol Acceptance

---

Chris-

I am writing to formally confirm that Inframark has thoroughly reviewed and understands the standard operating procedures established at HMGMA. We recognize the importance of the established protocols in ensuring safe, efficient, and compliant operations of the HMGMA wastewater pretreatment facility.

We hereby agree to comply with all established protocols and commit to adhering to the guidelines outlined in the documentation provided. Our team is dedicated to maintaining the highest standards of operations, safety, and compliance.

Thank you for your support in this matter. We look forward to continuing our collaboration to ensure successful operations at HMGMA.

## Memorandum

**DATE:** October 3, 2024  
**TO:** Chris Johns, HEAFM  
**FROM:** Mitch Brown, Inframark  
**SUBJECT:** Increase in Conductivity and TDS Request to City of Savannah

---

Chris-

In reviewing the Conductivity and Total Dissolved Solid (TDS) concentrations in the wastewater effluent and based on our need to add additional chemicals to precipitate Zinc and Copper from the wastewater received from the facility, I recommend that Hyundai request to the City of Savannah the following increased concentration ranges for Conductivity and TDS.

- **Conductivity –**
  - 1,200 to 2,000 uS
- **TDS –**
  - 750 to 1,250 mg/L

If you have any further questions, please let me know.

Thank you

## Effluent

Re: WWTP Chemical Treatment Plan

Christopher:

I put together this letter to briefly describe the chemical plan we are recommending for your plant. The Chemtreat team has been on site multiple times since startup and has completely surveyed all Wastewater Treatment and equipment and has begun chemically verifying our treatment plan to demonstrate our ability to meet your current permit limitations.

Chemtreat has the distinct pleasure of providing wastewater chemicals and engineering services to over 50 major automotive assembly facilities throughout the United States. As with most assembly plant waste streams, metals such as zinc, copper, and nickel are typically the major concern with respect to discharge permit compliance. While the equipment and chemistry will vary site to site, the basic principles to remove metals from the waste stream are well established and proven.

The Wastewater facility at Hyundai treats water from both the pretreatment line (PT), and the ecoat line, ED or Concentrate. Metals typically come from the conversion coating process in the pretreatment system. Whether Zinc, Zirconium, or Hybrid conversion coating process being used, typically relatively low levels of metals are carried out in the rinse water overflows to the waste treatment plant. This water mixes with rinse water from the cleaner/degreaser portion of the pretreatment line which will sequester the metals and, at times, make chemical removal difficult.

During our visit this week, we took multiple samples of wastewater influent from your general equalization tank to perform benchtop jar testing. In this testing, we evaluate different

Internal Use Only

Corporate Office | 5640 Cox Road | Glen Allen, Virginia 23060  
(804) 935-2000 | [www.chemtreat.com](http://www.chemtreat.com)

treatment techniques to determine what we will require chemically to break the metal chelation and precipitate metals, separate them from the bulk water, and discharge water in compliance with the permit limitations.

Our treatment scheme starts with a Cationic Coagulant. The coagulant, P8285L, is a blend of Inorganic and organic coagulants designed to break chemical emulsions as well as destabilize colloidal material. This frees up contaminants to be precipitated from the water and removed either by settling or floating the solids out. During our testing, we screened multiple different coagulants, varying charge density and inorganic metal salt composition and preliminary testing shows that the P8285L is showing the most promise.

Once the primary emulsions and surfactants are broken, we raise the pH of the solution to the minimum point of solubility for the target metals as their hydroxides. In our case, zinc hydroxide and copper hydroxide. The graph below shows this optimal pH to be in the range of 9.2 pH.

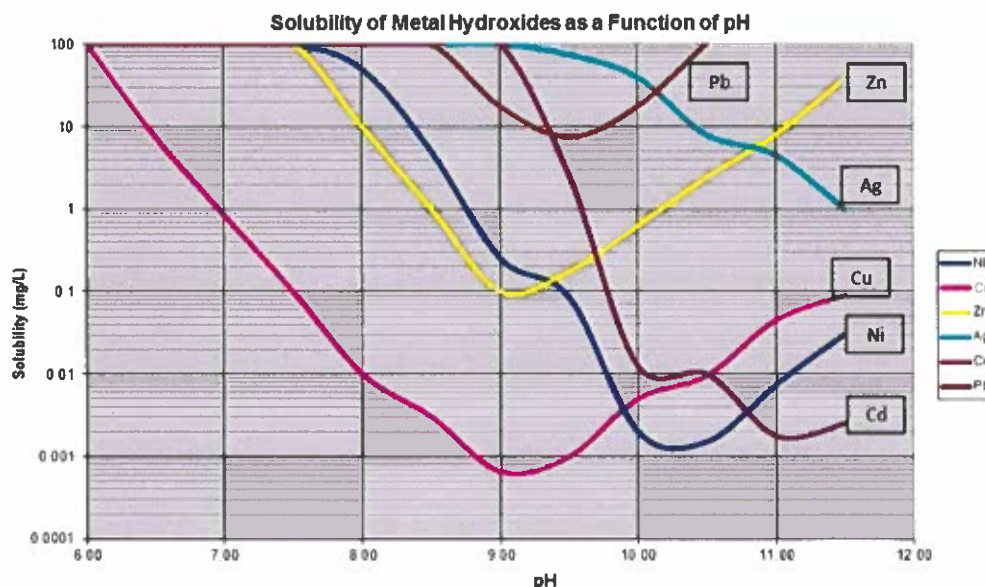

Figure 1. Solubility vs. pH

After we remove as much of the target metals using basic hydroxide settling, we then feed a sulfide based metal precipitant to effectively polish the water, removing excess permitted

metals that remain dissolved after the hydroxide step. You can see in the graph below that sulfide based treatment allows you to remove targeted metals to concentrations below that of standard hydroxide precipitation.

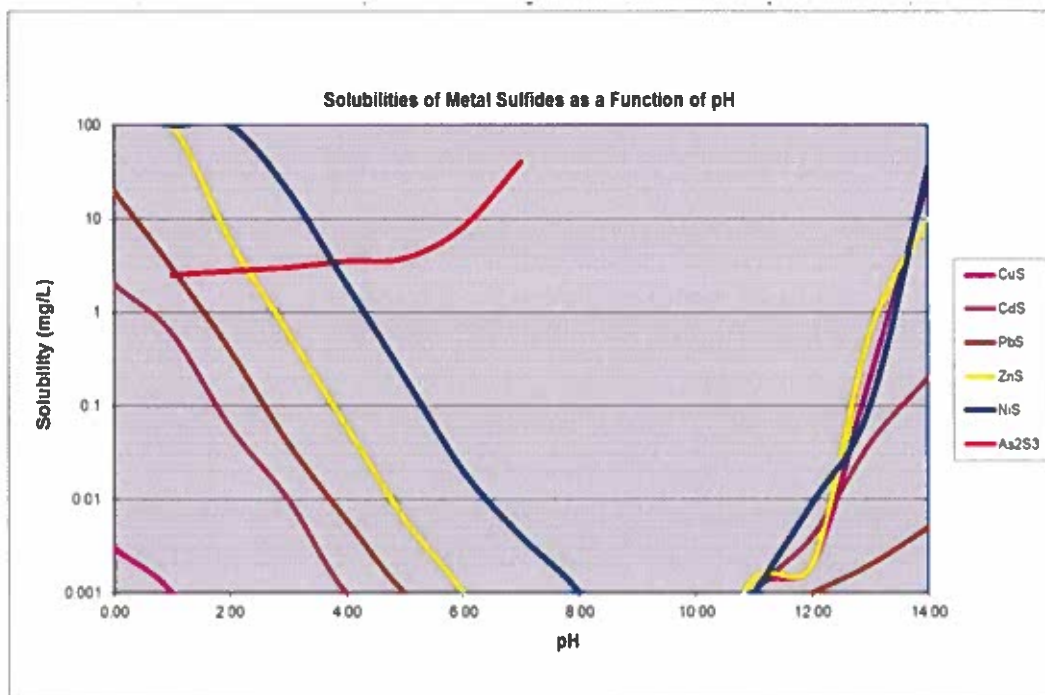

Figure 3. pH vs. Solubility

We then add an anionic Flocculant, P817L, to the water to increase particle size, making it easier to separate the solids from the liquid.

We tested multiple different metal precipitants which have different characteristics and sent samples in for Laboratory ICP testing to confirm results. It should be noted that samples were sent off to our Chemtreat lab to confirm results. When testing for zinc and copper at sub-ppm levels, one must be very careful on what analytical technique is chosen. Spectrophotometric methods have historically been used at plant locations to confirm metals concentrations prior to discharge. This method is no longer dependable. Discharge permit levels have been reduced to the point where we highly recommend more accurate and dependable methods to confirm compliance. Photometric testing depends on a chemically inducing a color change in a complex treated sample of wastewater. You then pass a beam of light through that sample at a specific wavelength. The variable nature of wastewater and the presence of many interfering

Corporate Office | 5640 Cox Road | Glen Allen, Virginia 23060  
(804) 935-2000 | [www.chemtreat.com](http://www.chemtreat.com)

ions make photometric methods useful as a guideline for basic treatment but not useful for verification that treatment and compliance is being met. Our lab results will be available early next week and will be provided to the plant.

We have a high level of confidence that changing your chemical treatment scheme to our, more robust, proven chemistry will allow us to achieve the results necessary to keep the plant in compliance. That said, chemically treating wastewater is not only a function of having the correct chemistry and dosage. Mechanical energy and reaction times play a crucial role in the success of any wastewater process. We do have some concerns on the intensity of mixing in the reaction tanks available at the plant as well as the overall reaction/retention time of the solution at each step in the chemical process.

Once the analytical data for our testing is available, we will provide our final recommendations and perform additional testing if needed. The wastewater at Hyundai is not unique to the industry and I have a high level of confidence that we can effectively treat the waste stream with the chemistry as described above. If shortcomings in the design are confirmed, we will make the proper engineering recommendations to correct the situation and work with the plant to explore modifications.

At Chemtreat, we pride ourselves on being able to present process recommendations in addition to chemical recommendations to ensure the goal of consistent compliance for all regulatory requirements.

Thank you for your support. Please let me know if you have any questions.

Sincerely,

**David Sunderlik**

Strategic Account Manager / Corporate Sales

## Attachment2. WWTP corrective action plan\_4-b) Lab improvement plan (ICP)

○ By purchasing ICP (Inductively coupled plasma), Checking the heavy metal (copper, zinc)

- 9/17 : copper / zinc exceed the limit of permit
- To check every 2hour, It is needed purchasing ICP

Current (lab testing)
✓ COD (every 2hour)
✓ TDS (every 2hour)
✓ Conductivity (every 2hour)
✓ PH (every 2hour)

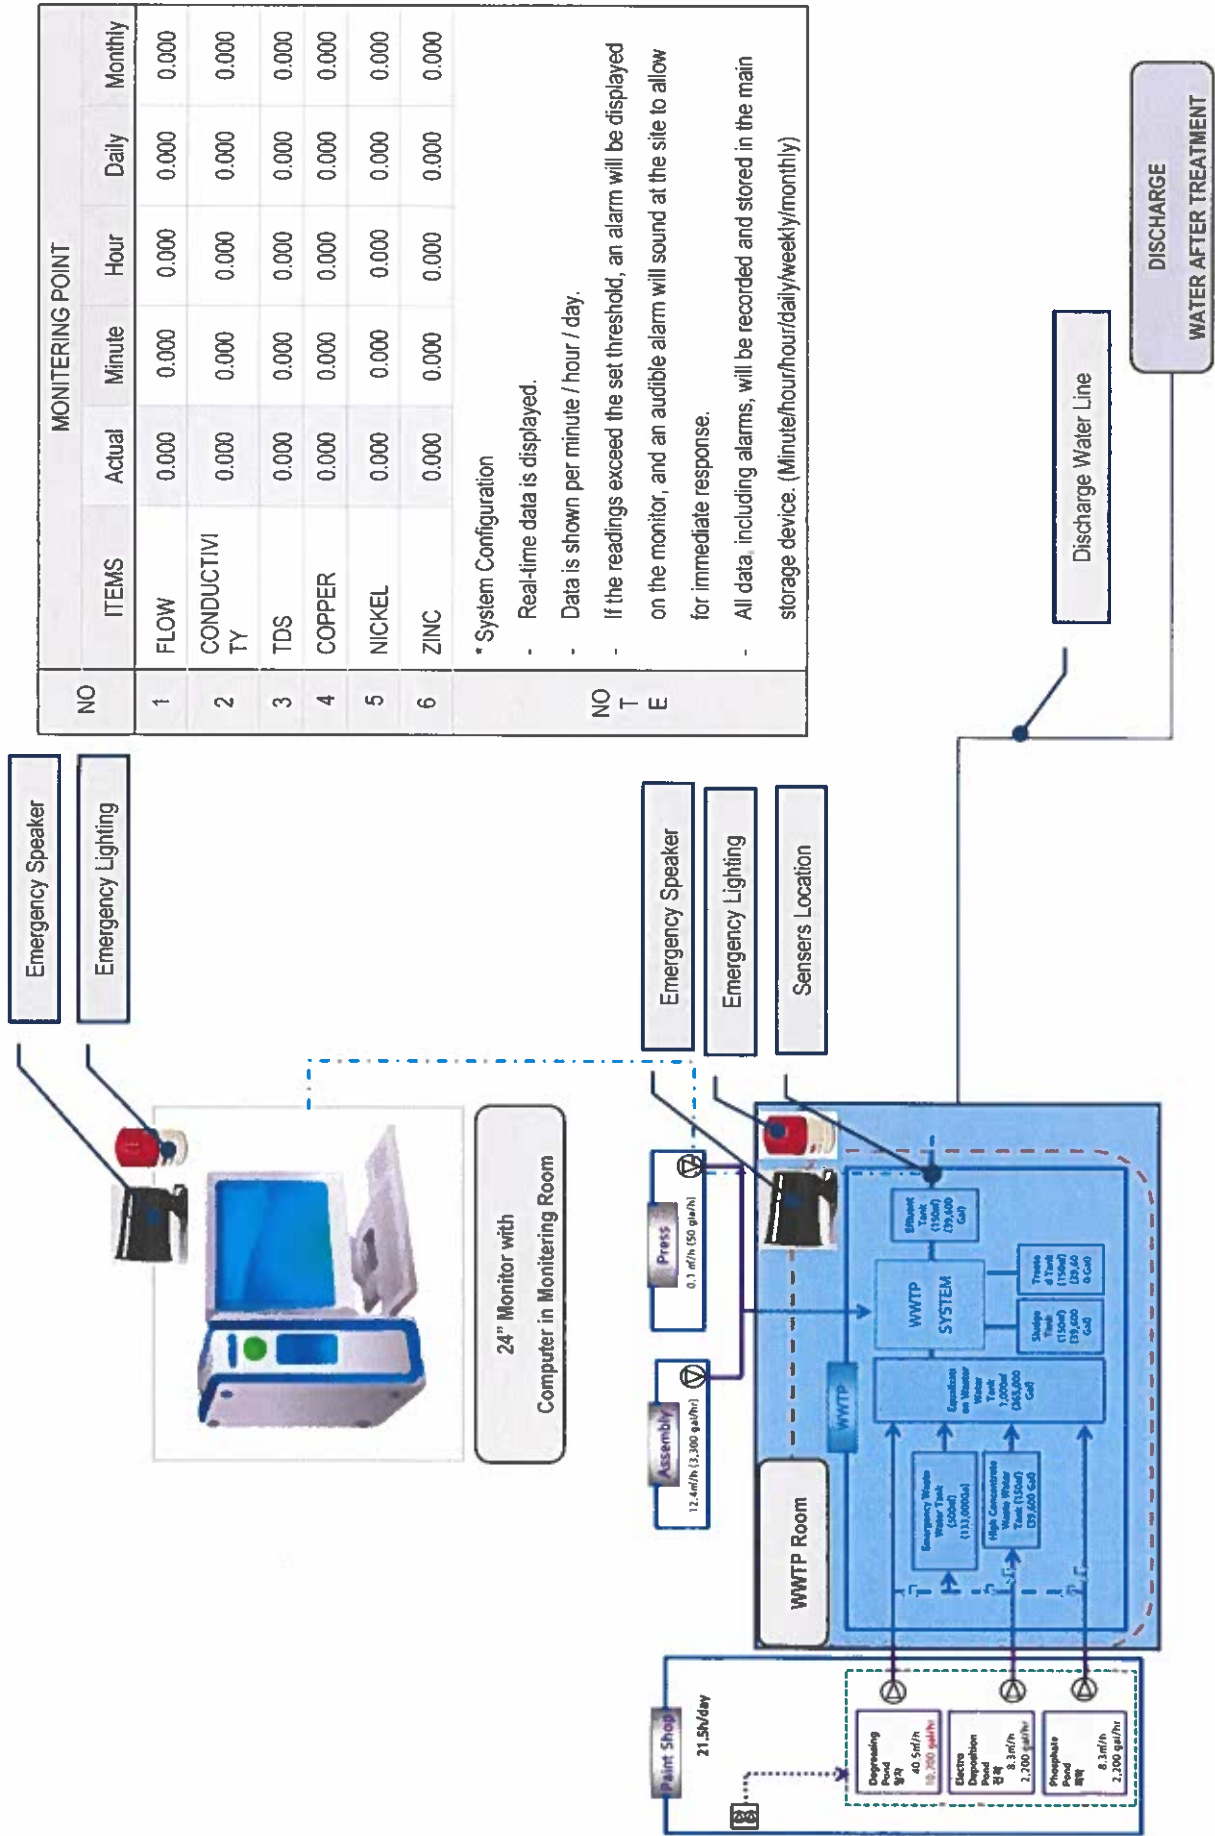

Improvement plan (lab testing)
✓ COD (every 2hour)
✓ TDS (every 2hour)
✓ Conductivity (every 2hour)
✓ PH (every 2hour)
✓ copper (every hour)
✓ Zinc (every hour)

Information of ICP	
✓ Feature	iCAP PRO XP
✓ peristaltic pump	4channel, adjust between 0-125rpm
✓ plasma viewing	radial and radial adjustable 6 to 18mm
✓ optical path purge	argon or nitrogen purged
✓ plasma gas flow	MFC, adjustable from 0-20.0 L/min
✓ array size	2048*2048, 4019 Mpixels

Internal Use Only

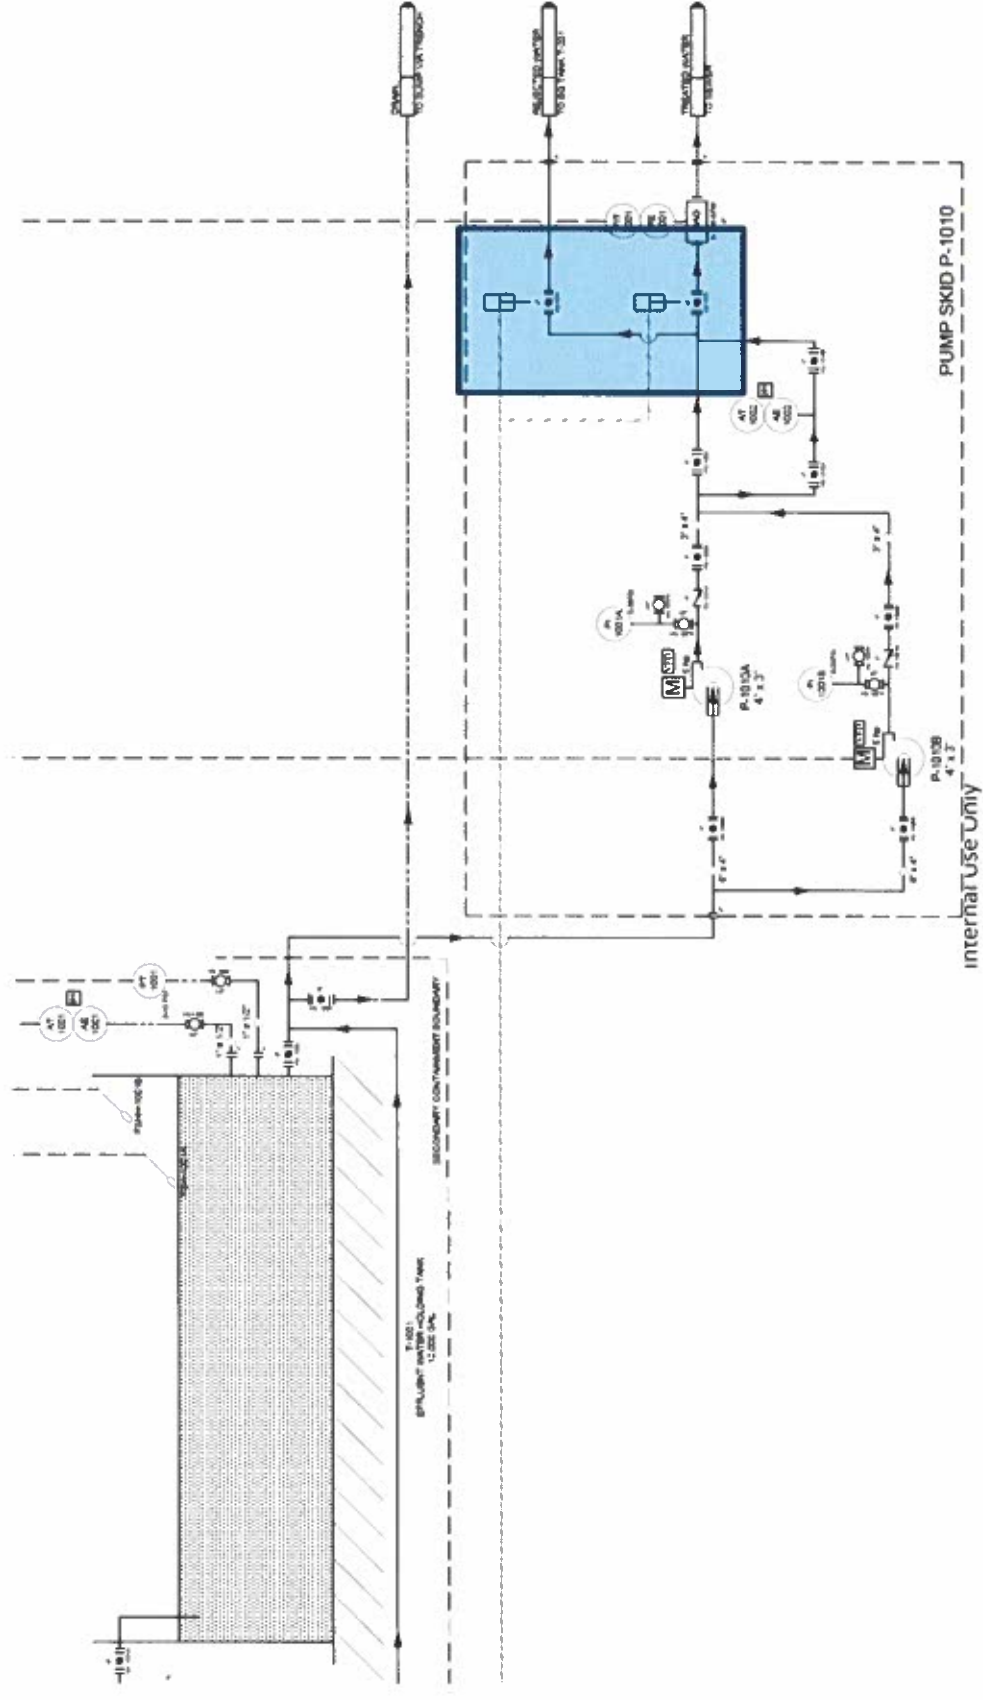

Attachment2. WWTP corrective action plan\_4-c) Data integrating & emergency alarm

Internal Use Only

## Attachment2. WWTP corrective action plan\_4-d) Improvement plan

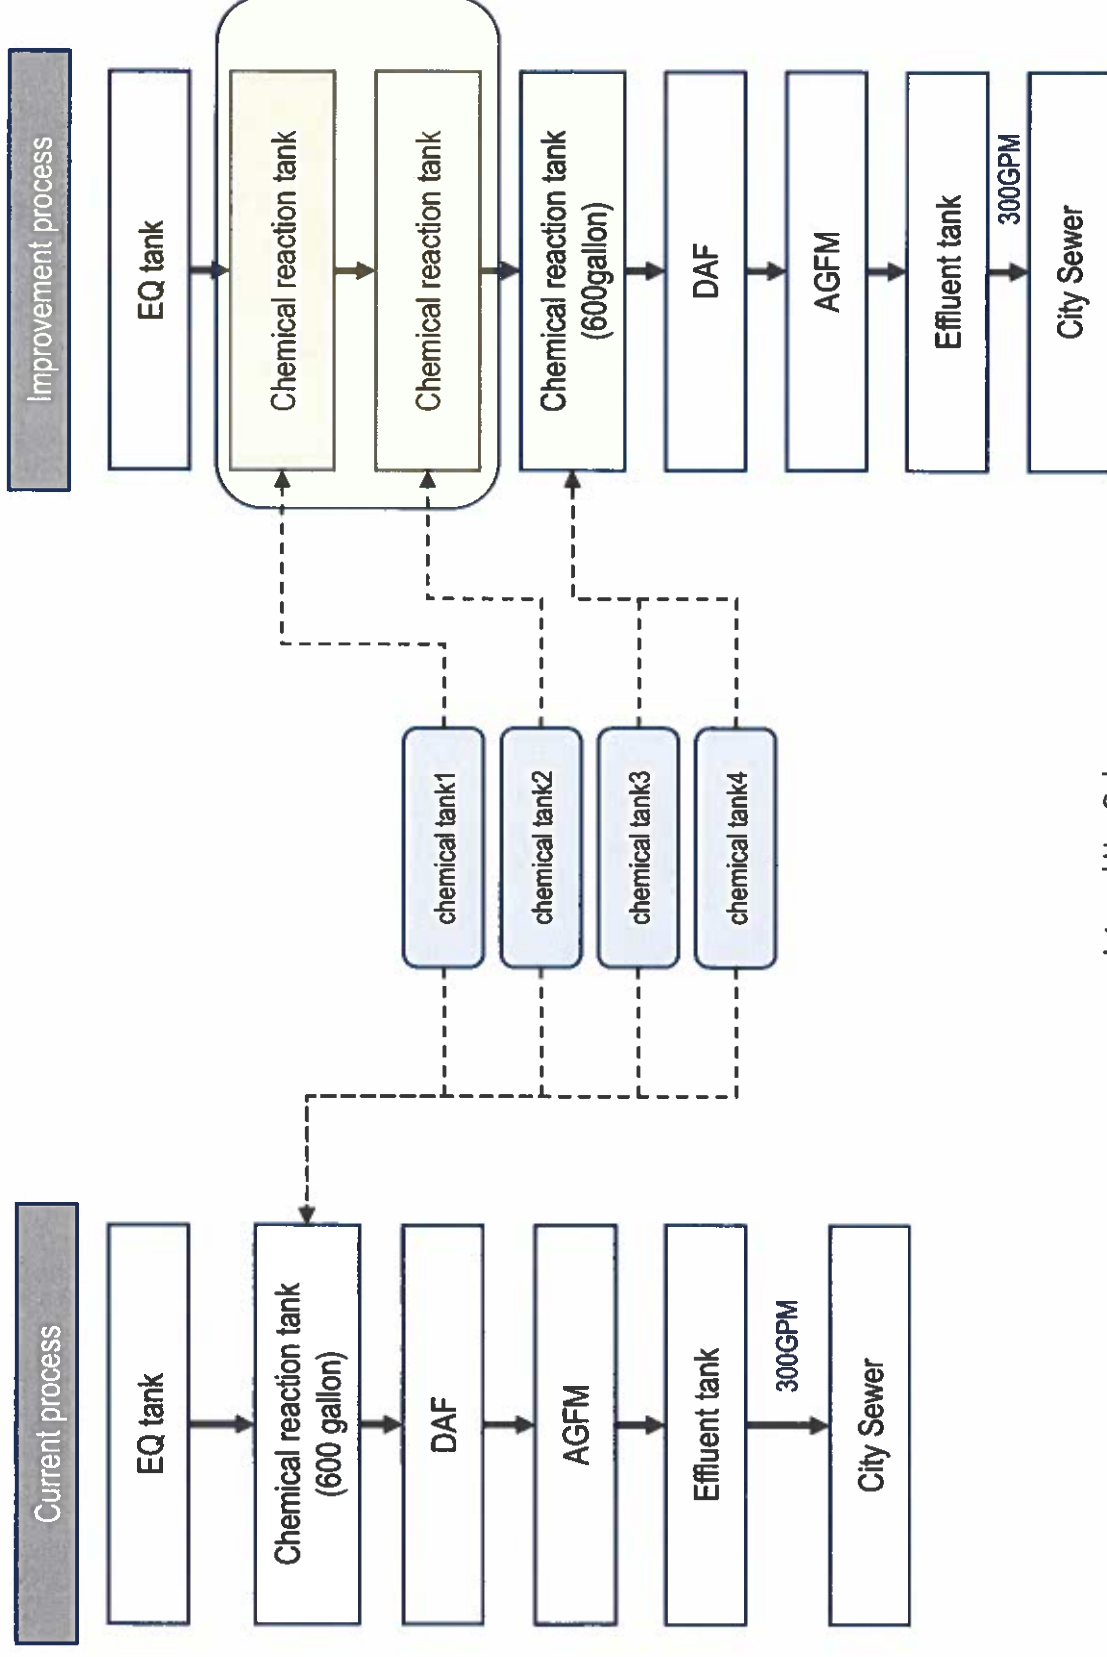

- At the section of discharge line, applied the logic in PLC
  - when water quality is incorrect, It will recirculate to EQ tank automatically
  - effluent tank → city S.V or Recirculation based on pretreated waste-water quality

## 4-d) Improvement plan

### ○ Install additional Chemical reaction tank to make reaction time to be longer

- Current chemical reaction time is ~2 min (AVG) & all chemicals injected into the same tank → reaction time could be improved
- After additional chemical reaction tank, reaction time will be longer → optimizing reaction process

December 19, 2024

Ms. Jacelyn Crumley, Director of Water Reclamation  
City of Savannah Water Reclamation  
1400 E President Street  
Savannah, Georgia 31404

**Re: CAP Implementation Update – 12/18/2024**  
**HMG Metaplant America Georgia Automobile Manufacturing Plant**  
**Ellabell, Georgia Plant**  
**Industrial Pretreatment Permit No. 20427-11**  
**WHEE Project No.: 24-115**

Dear Ms. Crumley:

This letter provides update to the actions specified in the Corrective Action Plan (CAP) for the Hyundai Motor Group Metaplant America (HMGMA) automobile manufacturing facility (Complex) in Ellabell, Georgia, which is in Bryan County. WHEE, Inc. personnel visited the site on December 11, 2024 to review current progress on the CAP and have had follow up discussions on additional actions completed since the site visit. Below is the list of CAP recommendations and current status.

1. The mixers/aeration in the equalization tanks are currently operated continuously in order to provide continuous mixing and suspension of suspended solids.
2. Daily flow measurements are being recorded daily for all installed influent flow meters. This data is available to wastewater operators and HMG personnel.
3. The pH probes in the Equalization, Emergency and High Concentration tanks have been reinstalled by suspending from the top of the tanks so they are measuring the actual water in the basin. This will improve the operational information available to the operators.
4. The previously existing lamella clarifier treatment train (High Concentration train) is used for pretreatment of the influent wastewater streams with the highest concentration metals. The chemical program for this train has been transitioned to recommended chemical program by ChemTreat, which was fully implemented on Monday, December 16, 2024.

5. The existing lamella clarifier was levelled and all discharge ports appear to be at the same water level. This will improve the hydraulic detention (localized) and velocities within the clarifier and improve performance.
6. Two (2) reaction tanks with a total of three (3) compartments have been installed at the site inside the wastewater pretreatment building. The first tank is the neutralization tank for pH control and metal hydroxide precipitation. The tank is approximately 5,000 gallons, which will provide over 14 minutes of reaction time, and is provided with a 2 Hp mixer. A ChemTreat coagulant will also be added at this step. The existing pH probe was relocated to this tank for automatic pH control. It is anticipated this system will operate at pH of 9.5 standard units. The second tank is the reaction tank, which provides two separate compartments. The first section is for metal sulfide precipitation chemical reaction and is 4,180 gallons, which will provide over 10 minutes of reaction time. The second section is for flocculant addition and is 2,000 gallons. The tanks have 1 Hp and 0.5 Hp mixers installed. The discharge from the third tank will be pumped to the existing DAF flocculation tanks for polymer addition, if needed, prior to gravity flow into the DAF.
7. A temporary clarifier has been installed after the DAF for additional polishing and solids removal. The clarifier is designed for a flow rate of 400 gpm and has a liquid volume of over 7,000 gallons. The clarifier includes an air diaphragm pump for transferring the settled solids to the existing sludge tank and a discharge tank and pump to transfer the effluent through the existing AGFM filters and final effluent tank.
8. A pH control system has been installed in the final effluent tank. This system consists of a chemical tote containment for a tote of sulfuric acid with a chemical feed pump. Aeration has also been provided in the final effluent tank to provide mixing. The chemical feed pump has been installed with the continuous pH monitor signal for automated pH control.
9. HMGMA has purchased and installed the Agilent ICP for metals analysis. Training was provided by the manufacturer last week and additional hands-on training is being provided this week for setup, operation, calibration, and reporting.
10. Additional lab equipment has been purchased as needed. In addition, existing laboratory operating procedures continue to be reviewed and updated during the startup phase for the constituents that will be required to be monitored onsite.

In addition to the required items in the CAP, HMGMA has also had the entire process control/SCADA system reviewed and updated in order to integrate the new equipment and ensure correct operation of all systems. This included modifying operator screens for better clarification and more intuitive adjustments.

Ms. Jacelyn Crumley

HMGMA will perform the required testing, as indicated in the revised draft permit, in order to establish a baseline for effluent quality. This baseline data will be presented to the City of Savannah and Bryan County as part of the final request to initiate discharge.

We appreciate the City of Savannah's (City) and Bryan County's continued support in resolving the issues of concern for HMGMA Plant.

Please feel free to contact me at (770) 844-0037 or at [whowe@wheeinc.com](mailto:whowe@wheeinc.com) should you have any questions on this update to the CAP.

Sincerely,

Woodruff & Howe Environmental Engineering, Inc.

Warren W. Howe, P.E.  
Vice President

**Re: Response to CAP Update – 12/18/2024**  
**HMG Metaplant America Georgia Automobile Manufacturing Plant**  
**Ellabell, Georgia Plant**  
**Industrial Pretreatment Permit No. 20427-11**  
**WHEE Project No.: 24-115**

Dear Mr. Rosenquist:

Woodruff & Howe Environmental Engineering, Inc. (WHEE) has visited the HMGMA plant since the temporary equipment was installed. Since that time, the plant has been completing startup of the equipment and repairing some components of the temporary equipment, such as controls and motors.

Based on our opinion, the sizing and process design of the treatment system is capable of meeting the discharge limits specified in the 11/7/2024 modified pretreatment permit with proper operation, appropriate treatment chemicals and chemical feed rates. This is supported by the chemical jar testing conducted before and after the installation of the temporary equipment.

The HMGMA plant has installed testing equipment to perform the required continuous and on-site daily analysis as required in the referenced permit.

HMGMA will ensure the required testing is performed, as indicated in the revised draft permit, in order to establish a baseline for effluent quality. This baseline data will be presented to the City of Savannah and Bryan County as part of the final request to initiate discharge.

We appreciate the City of Savannah's (City) and Bryan County's continued support in resolving the issues of concern for HMGMA Plant.

Please feel free to contact me at (770) 844-0037 or at [whowe@wheeinc.com](mailto:whowe@wheeinc.com) should you have any questions on this update to the CAP.

Mr. Shawn Rosenquist

**DATE:** January 14, 2025  
**TO:** Issac Choi, HMGMA  
**FROM:** Mitch Brown, Inframark  
**RE:** Responses to City of Savannah, REVISED

---

Per the City of Savannah's CAP response, please see the below answers to their questions.

1. The 11/7/24 COS conditional approval of the CAP required flow-weighted composite sampling, but no flow-weighted composite sampling of pretreatment effluent was provided to demonstrate the treatment capabilities of the industrial pre-treatment system. If this data exists, please provide it to the COS and BC.

**To satisfy the flow weighted composite sampling requirement, the below junction box module and power supply was added to allow for communication between the effluent Endress & Hauser Flow Meter and the Hach Composite Sampler. The composite sampler will be programmed to allow for flow weighted sample collection.**

- **Hach Universal Junction Box for 4-20mA, Part# 9501000**
  - Link: [Universal Junction Box for 4-20mA | Hach](#)
- **Hach, Power Supply with 3-Pin Connector, 115 V, US plug, Part # 8754500US**
  - Link: [Power Supply with 3-Pin Connector, 115 V, US plug | Hach](#)

**Beginning on 1/16/25, Inframark will begin collecting flow weighted composite sampling. The plan is to incorporate the composite sampling into a (5) day process verification test. As of now, the sampling will not be performed on (5) consecutive calendar days, but (5) consecutive business days.**

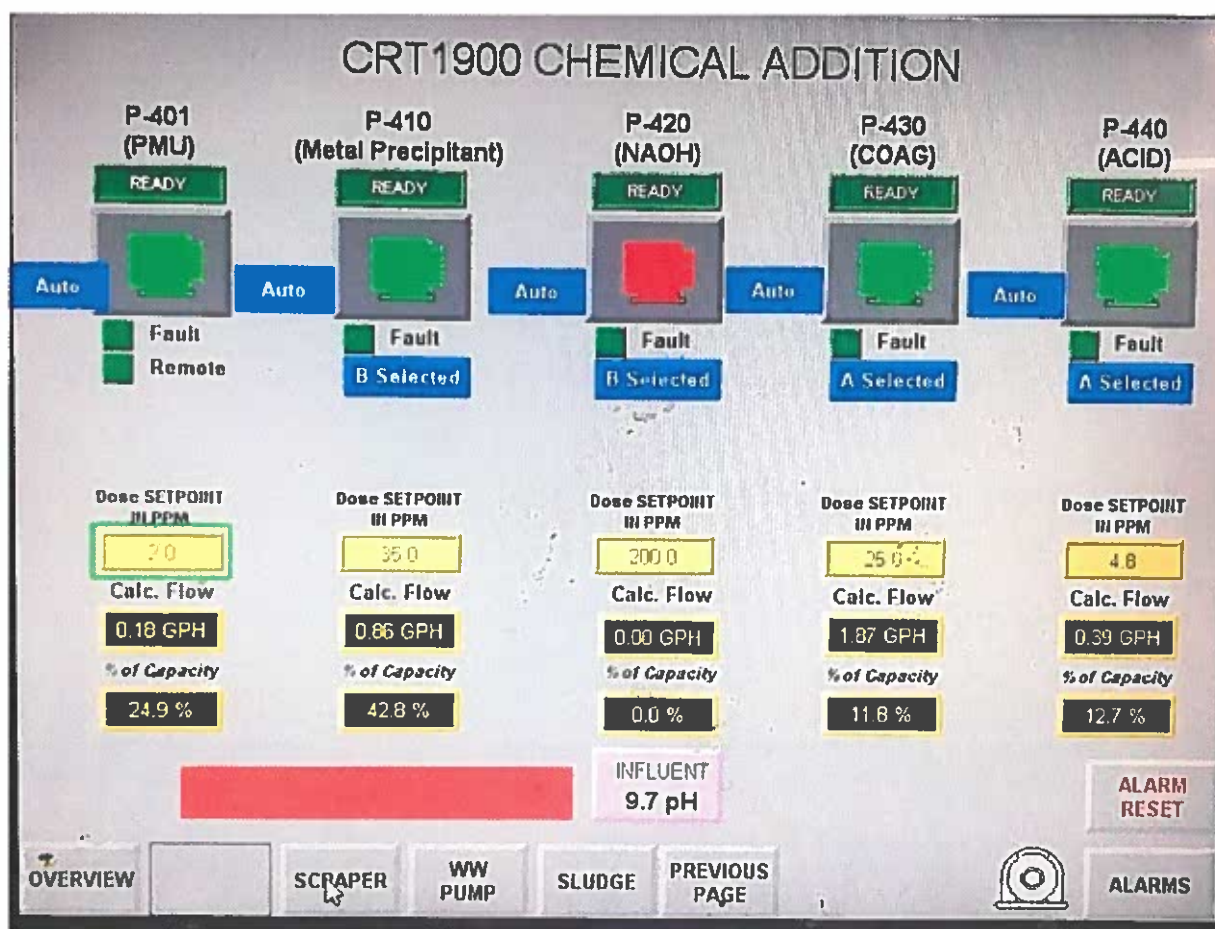

**Samples collected will be analyzed "in house" for the permit parameters that internal testing capabilities exist, with split samples sent to a 3<sup>rd</sup> party laboratory for analysis for all discharge permit parameters.**

2. The 10/22/24 CAP indicated under action 6 that three reaction tanks would be added, while the 12/19/24 update indicates only 2 have been installed. Please provide explanation for this reduction.

There are three tanks installed. The Reaction Tank is a two-compartment tank, and the Neutralization Tank is a single compartment tank. Please see the drawing provided, included as Exhibit A.

3. Please provide more detailed explanation on how the jar test results from the 10/22/24 CAP under action 11 have been integrated into the current treatment system configuration.

The wastewater treatment system's controls program was modified to allow for an operator to input the jar testing results in a "PPM" unit of measure, rather than having to convert the result from "PPM" to "Liters/Hours, which was the program's previous unit of measure. Under the new program, an operator conducts the jar test and determines the required PPM dosage for a successful treatment. The operator inputs those results in the below screen. Based on the PPM value entered, the chemical feed pump's speed will automatically adjust to feed the specified dosage (in GPH) based on pump capacity. Using 4 -20 mA control, with 4 mA being 0 GPH and 20 mA being the maximum output of the chemical feed pump in GPH, the chemical feed pumps for the coagulant, metal precipitant, and flocculant (PMU) will adjust per scaling programmed for each chemical feed pump.

Additionally, the pH continues to be automatically adjusted via an operator inputted set point. The pH set point controls the Sodium Hydroxide 50% and Sulfuric Acid 96% feed pumps via PID loop.

After the original jar testing performed on 10/10/24, additional jar testing was conducted on 12/19/24 to verify original test results. There were (2) sets of jar tests performed at different dosages and pH's.

Jar testing and ICP analysis results are below.

#### Jar Test #1:

SOLUTION LABEL	pH	P8285L	P8007L	P817A
T6	9.5	200	100	20
T5	9.5	200	50	20
T9	9.5	200	0	0
T9+2	9.5	200	0	2

#### ICP Analysis Results:

T-12	pH 3.0, 400 ppm FeSO <sub>4</sub> , pH 9.5, 50 ppm P8007L	<0.01	<0.01	913
T-13	pH 3.0, 400 ppm FeSO <sub>4</sub> , pH 9.5, 100 ppm P8007L	0.02	0.01	1102

Based on the jar tests conducted and the analytical results, Chemtreat Coagulant P8285L, Metal Precipitant P8007L, and Flocculant P817A were selected for the specialty treatment chemicals, along with commodity Sulfuric Acid 93% and Sodium Hydroxide 50% for pH adjustment. The chemicals have been purchased and are on-line.

**Selected dosage range per product are:**

<b>CHEMICAL</b>	<b>DOSAGE RANGE (PPM)</b>
P8285L	100-250
P8007L	50-100
P817A	5-20
pH	9.5-10.0

4. The 10/22/24 CAP indicated that WHEE would serve as the third-party specialty owners engineer/consulting engineer to review "...the suitability of our pretreatment system..." Please provide a statement from WHEE on whether, in their professional opinion, the current system and standard operation of that system is now capable of (1) maintaining effluent concentrations within all limits specified in the 11/7/2024 modified pretreatment permit and (2) providing sufficiently for all the monitoring and reporting requirements contained therein.

**WHEE letter is included as a separate attachment.**

5. The 11/7/24 COS conditional approval of the CAP required the presence of a certified lab analyst or wastewater operator on site at HMGMA. Please provide response on the status of this requirement.

**Inframark is temporarily providing a certified lab analyst, with Hyundai sending their Wastewater Plant Manager to the laboratory certification training class the week of 1/13/25, with plans for him to acquire the Lab Analyst certification. Additionally, beginning on 1/13/25, Inframark has added a Class I Wastewater Operator to their operating staff. Their certifications are provided as Exhibit C.**

6. The 10/22/24 CAP indicated under action 10 that laboratory equipment would be available on-site for pH (continuous and benchtop), conductivity (continuous and benchtop), COD, total zinc, and total copper. Please provide additional detail in your update on whether there is now equipment and laboratory testing abilities available on-site for at least all these listed parameters.

**Laboratory equipment exists for continuous and benchtop pH and conductivity. Also, the laboratory includes a new Agilent ICP instrument for Total Zinc and Copper analysis. Additionally, a Hach DRB200 Digital Block Reactor and Hach 1900 spectrophotometer exists for COD analysis.**

**A complete laboratory equipment listing is provided as Exhibit B.**

Subject: RE: Hyundai Plant- Manifests Process Wastewater

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon Michelle,

In follow-up to your recent request for all process wastewater manifests, please see attached. The process wastewater is transferred to tanker trucks to be hauled off site for disposal. HMGMA has contracted with Hyundai Materials for waste management. Hyundai Materials is responsible for managing the transfer of the wastewater to the trucks and for disposal. Per our agreement with Hyundai Materials (copy attached for reference), when the waste is transferred to Hyundai Materials' possession, they are responsible for the proper disposal. The attached collection tickets dated from 10/10/24, document the transfer of the wastewater to Hyundai Materials. The collection tickets show the transfer of responsibility for the process wastewater from HMGMA to Hyundai Materials as the tanker trucks exit the HMGMA security gate. We have been in contact with Hyundai Materials about your request and they should be able to provide you with the manifests showing where the wastewater was disposed or direct you to the appropriate vendors managing disposal on their behalf. Some of these documents were brought to the HMGMA site for your review in person and were returned to Hyundai Materials possession afterwards.

The Agreement and waste removal process with Hyundai Materials is still in the implementation phase and we have been using the collection tickets as a gap-fill until the agreement procedure/forms are memorialized and approved by both parties. We intend to have a more detailed form showing the contents of waste being transferred to Hyundai Materials, along with the appropriate

acknowledgments related to disposal of the waste in accordance with the Agreement and applicable law. Is there any specific information you would like to see on these forms to ensure we are documenting the activities appropriately? We can discuss this matter further at your convenience – or if you would like to see the final form before it is approved, please let me know.

Best regards,

Reid Dieringer

Subject: RE: Hyundai Plant- Manifests Process Wastewater

Michelle,

I hope this email finds you well. I am writing to provide an update on the information you requested regarding all process wastewater manifests. We are actively working toward gathering the necessary details, but due to the holiday season, there have been some delays due to the holiday season. I appreciate your understanding and patience during this time. If you have any questions or need any interim updates, feel free to reach out.

Thank you for your attention to this matter.

Subject: Hyundai Plant- Manifests Process Wastewater

Mazen and Hyun,

During my last visit to the facility, we spoke about all process wastewater manifests being sent to me. Please send them as soon as possible to this email address. The manifests that should be included is everything that has been pumped and hauled since City of Savannah has cut off the main discharge. Please let me know if you have any questions.

## SERVICE AGREEMENT

This Service Agreement (the "Agreement") is dated and effective as of October 1, 2024, and is between Hyundai Motor Group Metaplant America, LLC, a Delaware limited liability company with its principle place of business located at 1500 Genesis Drive, Ellabell, Georgia 31308 ("HMGMA"), and Hyundai Materials Savannah, Inc., a Georgia corporation with its principal place of business located at 101 W. Mulberry Boulevard, Suite 220, Savannah, Georgia 31507 ("Vendor").

### THE PARTIES AGREE AS FOLLOWS:

1. **Services.** Vendor shall provide the services described in the Scope of Work (the "Services") which is attached hereto, incorporated herein and by reference made a part hereof as Exhibit A. Vendor shall furnish all necessary labor, materials, equipment, supplies and other items necessary for the proper performance of the Services. HMGMA may reject any Services not performed in accordance with this Agreement. Vendor shall promptly correct, at its sole expense, all Services rejected by HMGMA. If such deficiencies are not immediately corrected, HMGMA may cause them to be corrected at Vendor's sole expense. Vendor shall perform the Services in accordance with HMGMA's schedule and completion dates. Time is of the essence with regard to Vendor's obligations under this Agreement.

2. **Term and Termination.**

(a) The term of this Agreement is from October 1, 2024 through October 31, 2027, unless sooner terminated in accordance with the terms and conditions of this Agreement. Extensions to the contract term shall be agreed upon in writing.

(b) HMGMA may terminate this Agreement for its convenience by providing thirty (30) days' prior written notice to Vendor. In the event of such a termination, HMGMA will compensate Vendor for all Services performed up to the date of termination. Such compensation shall constitute HMGMA's sole liability in the event of such a termination and Vendor expressly waives and releases any additional claims including anticipated profits or fees.

(c) HMGMA may terminate this Agreement immediately for cause by written notice if Vendor is in breach of any provision of this Agreement. Vendor shall not be entitled to any further payment under this Agreement in the event of such a termination for cause. HMGMA also reserves all of its rights and remedies if Vendor fails to perform under the terms and conditions of this Agreement.

3. **Representations and Warranties.** Vendor represents and warrants the following:

(a) Vendor shall perform the Services in a professional, timely, and workmanlike manner in accordance with the terms of this Agreement. Vendor possesses a high level of experience and expertise in providing the Services, and shall perform the Services with care, skill, and diligence of a service provider with such experience and expertise. The Services shall be merchantable and fit for the purpose intended by HMGMA. Acceptance of any Services by HMGMA shall not be deemed to alter or affect the obligations of Vendor or the rights of HMGMA under this Agreement.

(b) Vendor is duly organized, validly existing, and in good standing under the laws of the State in which it is organized and is qualified and authorized to do business in the State of Georgia. Vendor's execution and performance of this Agreement is within its authorized powers. Vendor has all necessary licenses and permits to perform the Services and shall furnish HMGMA with evidence of all such permits and licenses upon request.

(c) Vendor is financially solvent, able to pay all debts as they mature, and possesses sufficient working capital to complete the Services and perform all obligations under this Agreement.

(d) The Services shall not interfere with HMGMA's business operations and shall comply with all applicable laws and HMGMA's rules, including without limitation all laws and rules stated in Section (a) of this Agreement.

(e) Vendor shall not use any silicone in connection with the Services and all equipment, materials, or lubricants used by Vendor in connection with the Services shall be free of silicone.

**4. Payment Terms.**

(a) HMGMA shall pay Vendor in accordance with the fee schedule stated in Exhibit B (the "Fee Schedule"). The prices listed in the Fee Schedule shall include all costs payable to Vendor for every aspect of the Services (e.g., materials, labor, equipment, testing, clean-up, disposal costs associated with packing and transport of materials, insurance, fees, taxes, travel, transportation, import fees or duties).

(b) Vendor shall submit an invoice to HMGMA for the Services within thirty (30) days of the end of the calendar month in which the Services were provided. All invoices shall include a summary of all Services performed by Vendor for the invoice period, with each invoice broken down by shop location, dates, tasks, and hours of work. Vendor shall furnish evidence satisfactory to HMGMA to support each element of measurement or cost in each invoice. Vendor shall provide HMGMA with any other documentation requested by HMGMA to support the Services invoiced, including interim and final lien waivers.

(c) HMGMA shall pay invoices within net thirty (30) days of receipt of such invoice for the Services completed, unless HMGMA has notified Vendor in writing of a good faith dispute regarding part or all of an invoiced amount. In such case, HMGMA and Vendor shall work together to resolve the dispute, and HMGMA shall pay Vendor the agreed to amount upon resolution.

(d) HMGMA shall be entitled to deduct from any payment due to Vendor under this Agreement any amounts that Vendor owes HMGMA in connection with the Services or this Agreement.

(e) Payment shall not be evidence of acceptance of the Services. Vendor warrants that title to all Services paid for by HMGMA pursuant to each respective invoice shall pass free and clear of all liens, claims, security interests and/or encumbrances of any kind. Acceptance of payment by Vendor shall constitute a release by Vendor of any liability of HMGMA and/or its agents arising out of or relating to the Services for which payment has been made. HMGMA shall not be obligated to pay Vendor in the event that Vendor is in material default of any of its obligations pursuant to this Agreement or Vendor has failed to promptly pay any of its subcontractors or suppliers for any portion of the Services for which HMGMA has paid Vendor. All payments are subject to HMGMA withholding an amount reasonably necessary, in HMGMA's opinion, to fully protect and insure itself against any actual or potential liability or damage directly or indirectly related to this Agreement or Vendor's breach or threatened breach of any other contract.

(f) The fees shall include payment for installation, service, and repair when applicable.

**5. Taxes.**

(a) General. Vendor's price shall include all taxes, impositions, charges and exactions imposed on or measured by this Agreement, except applicable sales and use taxes that are separately stated on Vendor's invoice, and/or any taxes, impositions, charges or exactions for which HMGMA has furnished or otherwise made available, HMGMA's Sales Tax Certificate of Exemption from the State of Georgia Department of Revenue ("DOR") with respect to its Competitive Project of Regional Significance designation (the "CPRS Certificate"), a Form ST-5M, other applicable DOR form providing for exemption, or other evidence of exemption (collectively, the "Sales Tax Exemption Certificate"). Unless otherwise specified in this Agreement, Vendor is liable and shall pay for all taxes, impositions, charges, and exactions which are not covered under the above-listed exceptions and/or exemptions.

(b) Exemption. In the event that HMGMA has provided the Sales Tax Exemption Certificate, then Vendor shall not include any allowance or amount for State of Georgia or other state or local sales and use taxes in calculating any payments due in connection with the performance of this Agreement. For any Service or Deliverable under this Agreement for which the Sales Tax Exemption Certificate has been so provided, Vendor represents that no Vendor Affiliate or other supplier to Vendor has included State of Georgia or other state or local sales and use taxes in the cost of goods sold to Vendor or HMGMA which forms any part of the Service and Deliverables under this Agreement. Vendor acknowledges that HMGMA is required to obtain and provide a list to the DOR of all vendors authorized to use this exemption, including their correct employer or taxpayer identification numbers.

(c) Withholding. If HMGMA is required by law to withhold and remit taxes under this Agreement, HMGMA shall: i) be entitled to reduce the payment by the amount of such tax; ii) withhold and remit such tax to the applicable tax jurisdiction; iii) assist Vendor to obtain the benefit of any reduced withholding tax under applicable tax treaties; and iv) furnish to Vendor a tax certificate or other acceptable evidence of payment of such tax as required by the relevant tax authorities. Vendor further acknowledges and agrees that, with respect to any Vendor payee which

receives payment for services, rents, royalties or interest in connection with this Agreement that would be subject to IRS Form 1099 reporting, a taxpayer or employer identification number shall be supplied to HMGMA. Twenty-four percent (24%) back-up tax withholding will be imposed on all Form 1099 reportable payments made to Vendor if Vendor fails to provide a correct taxpayer identification number.

(d) **Indemnity.** Vendor shall defend, indemnify, and hold HMGMA harmless from and against all liability for the wages, salaries, and other remunerations paid to persons employed by Vendor in connection with the performance of this Agreement. If a claim is made against HMGMA for taxes that Vendor is liable for a payment or indemnity under this Section, HMGMA will promptly give the Vendor notice in writing of such claim. HMGMA's failure to give notice will not relieve Vendor of its obligations for payment and indemnity under this Section. Vendor will be required to remit payment to HMGMA or tax authority, as appropriate, unless Vendor is permitted by applicable law to contest such claim and defer payment in accordance with the law. The expense and coordination of such contest will be borne by Vendor.

6. **Accounting and Audit.** Vendor shall maintain accurate and complete accounting records and vouchers in support of all cost billings to HMGMA in accordance with generally accepted accounting principles and practices. HMGMA, or its representative, shall have the right at any reasonable time to examine and audit the records, vouchers, and their source documents which serve as the basis for compensation, other than compensation which is a fixed amount, such as a fixed price or fixed fee. Said records shall be available for at least six (6) years after delivery of the Services for HMGMA's inspection and audit. Vendor shall furnish such breakdown of the price, as may be reasonably requested by HMGMA to satisfy governmental auditing requirements. In addition, Vendor shall make available to HMGMA accounting records necessary to establish the financial condition of Vendor in compliance with this Section and Vendor's Warranties contained herein.

7. **Claims.** Vendor shall give HMGMA written notice within five (5) working days after the happening of any event which Vendor believes may give rise to a claim for an increase in the amount owed to Vendor or in the scheduled time for performance of the Services or for any other relief with respect to the terms of the Agreement. Within ten (10) working days after the happening of such event, Vendor shall supply HMGMA with a statement supporting its claim. The statement shall include Vendor's detailed estimate of the adjustment in the amount owed and scheduled time incurred and the circumstances requiring the adjustment requested in the claim necessitated by said condition or event. HMGMA shall not be bound to any adjustments for Vendor's claim unless agreed to by HMGMA in writing. The parties shall negotiate in good faith to reach an agreement, but in no case shall Vendor suspend performing the Services during negotiation, except with HMGMA's prior written consent. No claim hereunder by Vendor or its Subcontractors related to the Services shall be allowed if the Vendor has not provided the written notice required by this paragraph or if it is asserted after final payment of an invoice under this Agreement. Vendor's remedies are limited to those expressly set forth in this Agreement.

8. **Confidentiality and Publicity.**

(a) **Confidentiality.** Vendor shall maintain in confidence and not disclose any Confidential Information of HMGMA. For purposes of this Agreement, the term "Confidential Information" means (i) all technical and non-technical information related to HMGMA's business and past, current, future, and proposed products and services, including, but not limited to, information concerning pricing, research and development, drawings, design details and specifications, know-how, processes, financial and technical data, procurement requirements, engineering and manufacturing information, vendor and supplier lists, business forecasts, sales information, warranty information, marketing plans, and other similar items related to HMGMA's business, whether disclosed to Vendor by HMGMA, directly or indirectly, in writing, orally or by inspection or observance of tangible items, and (ii) any information that may be made known to Vendor and that HMGMA has received from others that HMGMA is obligated to treat as confidential or proprietary. The Confidential Information shall remain the sole property of HMGMA and shall not be: (1) copied or otherwise reproduced; (2) used by Vendor in any way except in connection with the performance of the Services as authorized by HMGMA; (3) disseminated or disclosed to third parties; or (4) used in any manner detrimental to the interests of HMGMA. Upon completion, cancellation or termination of this Agreement, Vendor shall promptly return to HMGMA or destroy (if requested by HMGMA) all such information furnished by HMGMA in

connection with this Agreement, including, but not limited to all Confidential Information. HMGMA's Confidential Information has federal law protection under the Defend Trade Secrets Act. Vendor will not be held criminally or civilly liable under any federal or state trade secret law for the disclosure of a trade secret that is made in a complaint or other document filed in a lawsuit or other proceeding, if such filing is made under seal, or is made (i) in confidence to a federal, state or local government official, either directly or indirectly, or to an attorney; and (ii) solely for the purpose of reporting or investigating a suspected violation of law. If Vendor files a lawsuit against HMGMA for retaliation for reporting a suspected violation of law, it may disclose the trade secrets to its attorney and use the trade secret information in that court proceeding only if it files any document containing the trade secret under seal and does not disclose the trade secret, except pursuant to court order.

(b) Publicity. Vendor shall not, without obtaining the prior written consent of HMGMA, at HMGMA's sole discretion, advertise or otherwise publish that Vendor has contracted to provide the Services to HMGMA. Vendor may not use HMGMA's name, logo or other branded assets without the prior written consent of HMGMA, at HMGMA's sole discretion.

#### **9. Indemnity and Remedies.**

(a) General. Vendor shall, at its sole expense, indemnify, defend (with counsel reasonably acceptable to HMGMA), and hold harmless HMGMA and its subsidiaries, affiliates, agents, employees, directors, officers, subcontractors (to whatever tier), successors, assigns, and representatives of each of them (collectively, the "HMGMA Indemnitees") from and against any claims, actions, causes of action, suits, demands, damages, losses, costs, liabilities, judgments, penalties, fees, fines, forfeitures, and expenses (including attorney's fees and court costs) of any type, whether direct, indirect, special, incidental or consequential, assessed administratively or judicially, arising out of or related to: (i) the Services; (ii) the presence of Vendor or its subcontractors or suppliers at the HMGMA's site; (iii) Vendor's breach of any provision of this Agreement; (iv) violation of any federal, state or local law, regulation, rule or ordinance by Vendor or its subcontractors or suppliers; (v) Vendor's or its subcontractor's employees claiming to be employed by HMGMA Indemnitees; or (vi) Vendor's or its subcontractors' or suppliers' negligence, errors, actions, omissions, or intentional misconduct. Damages shall include without limitation damage to HMGMA Indemnitees' property or the property of others, personal injuries or death, and production downtime. This indemnification obligation shall not be limited in any way by any limitation of the amount or type of damages, compensation, or benefits payable by or for Vendor or its subcontractors or suppliers, or other individual or entity under workers' compensation acts, disability benefit acts or other employee benefit acts.

(b) Environmental. Vendor is solely responsible for the proper handling, transportation, storage, use, recycling, removal and/or disposal of the materials related to this Agreement, including any regulated substances. Vendor shall, at its sole expense, indemnify, defend (with counsel reasonably acceptable to HMGMA), and hold harmless HMGMA Indemnitees from and against any and all environmental claims, losses, actions, causes of action, suits, demands, damages, liabilities, deficiencies, judgments, interest, penalties, fees, fines, and forfeitures, expenses, injury, death, or property damage, including attorney's fees, professional fees and costs, and the cost of enforcing any right to indemnification hereunder, and the cost of pursuing insurance providers arising out of or relating to (i) the Vendor's (or its subsidiaries, affiliates, agents, employees, directors, officers, subcontractors (to whatever tier), successors, assigns, and representatives) handling, transportation, storage, use, recycling, removal and/or disposal of the waste materials related to the Agreement including any regulated substance, (ii) any negligence or willful misconduct of the Vendors (or its subsidiaries, affiliates, agents, employees, directors, officers, subcontractors (to whatever tier), successors, assigns, and representatives) in connection with the foregoing activities ("Environmental Damages"). Vendor agrees to assume responsibility for any Environmental Damages which existed prior to the Effective Date of this Agreement resulting directly from the Vendor's Services. This Section shall survive any termination or expiration of this Agreement for any reason.

(c) Proprietary. Vendor shall, at its sole expense, indemnify, defend (with counsel reasonably acceptable to HMGMA), and hold harmless HMGMA Indemnitees from and against all claims, actions, causes of action, demands, administrative proceedings and all damages, costs, fines, expenses and liabilities of any kind incurred by the HMGMA Indemnitees (including attorneys' fees) or awarded in any proceeding brought against the HMGMA Indemnitees, in which it is alleged that the performance or use of any of the Services or ancillary products furnished by Vendor hereunder constitutes an infringement of any patent or other proprietary information right. If such use is held in any

such proceeding to constitute an infringement and is enjoined, Vendor, at its expense, shall either: i) procure for HMGMA the right to use the Services or ancillary products; ii) replace same with substantially equal but non-infringing products or Services; iii) modify same to make them substantially equal but non-infringing; or iv) remove same and refund the purchase price and transportation and installation costs.

(d) Remedies. All remedies provided for in this Agreement to HMGMA are nonexclusive remedies and are in addition to any other remedies, at law or in equity, available to HMGMA

#### 10. Insurance.

(a) Types and Amounts of Coverage. During the Term of this Agreement, Vendor shall, at its own expense, maintain and carry applicable insurance in full force and effect in amounts not less than those described below and reasonably adequate to cover the associated risks of the Services, including but not limited to the following: (i) Workers' Compensation, as required under the laws applicable to the Service, and Employer's Liability insurance with limits of \$1,000,000 each accident for bodily injury by accident and \$1,000,000 each employee for bodily injury by disease; (ii) Comprehensive General Liability, including products liability and contractual liability, covering bodily injury, property damage, and personal injury, with not less than \$1,000,000 each occurrence and \$2,000,000 annual aggregate; (iii) Automobile Liability covering all automotive equipment used in connection with the Services, with not less than \$1,000,000 combined single limit of liability for bodily injury and property damage; (iv) if applicable, Professional Liability with limits of not less than \$1,000,000 per claim and in the aggregate; and (v) Umbrella/Excess insurance on an occurrence basis in excess of the underlying insurance described above with minimum limits of liability of \$5,000,000 per occurrence and annual aggregate. Vendor agrees to furnish evidence of insurance coverage upon the reasonable written request of HMGMA.

(b) Additional Insured. Insurance carried in accordance with this Section 10 shall, to the extent of the indemnities set forth in Section 9, be endorsed to provide that HMGMA, including its parent, affiliates, officers, directors, and employees, shall be included as an additional insured (except for Workers' Compensation, Employer's Liability and Professional Liability insurance) with the understanding that any obligation imposed upon the insured (including the liability to pay premiums and deductibles) shall be the sole obligation of Vendor and not that of HMGMA. If the insurance is written to cover more than one insured, all terms, conditions, insuring agreements and endorsements, with the exceptions of limits of liability, shall operate in the same manner as if there were a separate policy covering each insured. Vendor's insurance shall be primary, without right of contribution of any other insurance or self-insurance carried by or on behalf of HMGMA related to the Services.

(c) Certificates of Insurance. Before starting the Services, Vendor will give HMGMA certificates of insurance satisfactory in form to HMGMA evidencing that the Insurance is in effect. If Insurance is cancelled by the insurer for any reason (including nonpayment of premium) or any substantial change is made in the coverage that affects the interests of Vendor and HMGMA, Vendor will provide HMGMA with thirty (30) days advance written notice from the insurer of the effective date of the cancellation or change.

(d) Waiver of Subrogation. All Insurance policies will waive all rights of recovery under subrogation, set-off, counterclaim, or otherwise, against HMGMA, its agents and representatives. Vendor will require its subcontractors and suppliers, to whatever tier, by appropriate written agreements, to give similar waivers each in favor of all Parties enumerated in this Section.

(e) Cooperation. Vendor agrees to fully cooperate and comply with all reasonable requirements and recommendations of the insurers and insurance brokers issuing or arranging for issuance of the Insurance or performing certificate tracking, in all areas of safety, insurance program administration, claim reporting and investigation, and audit procedures.

(f) The interests of HMGMA and Vendor shall not be invalidated by any action or inaction of any other person, and HMGMA shall be insured regardless of any breach or violation by Vendor or any other person of any warranties, declarations, or conditions contained in Vendor's insurance policies.

(g) Unless otherwise agreed by HMGMA, Vendor shall include in each subcontract and purchase agreement provisions and insurance requirements not less favorable to Vendor than those contained in this Section 10, except that "Vendor" will be substituted for "HMGMA," with HMGMA named as an additional insured, and "subcontractor" will be substituted for "Vendor." All such subcontractors shall provide certificates of insurance to HMGMA evidencing such insurance requirements before performing Services for HMGMA under this Agreement or being

admitted on HMGMA's premises. Vendor agrees that if its subcontractors or suppliers fail to procure and maintain insurance as required, all such required insurance shall be procured and maintained by Vendor at Vendor's expense.

**11. Compliance.**

(a) General. Vendor shall at its expense comply with all applicable federal, state and local codes, laws, regulations, standards, and ordinances in the performance of the Services. This shall include without limitation all federal and state laws and regulations regarding discrimination in employment, including Title VII of the Civil Rights Act of 1964, as amended. Vendor shall demonstrate its compliance with all applicable laws, HMGMA's rules, and Vendor's policies and programs at the request and satisfaction of HMGMA.

(b) OSHA. Vendor shall initiate and maintain such permits and programs as may be necessary to comply with requirements set forth by the Occupational Safety and Health Administration ("OSHA") and any other local, state, and federal regulations. If OSHA permits are not required to perform the Services, a letter shall be submitted by Vendor to HMGMA prior to commencement of the Services stating that no permits are required.

(c) Hazardous Materials and Safety Data. (i) Vendor shall properly label all containers of hazardous materials or components and furnish a Safety Data Sheet ("SDS") for each hazardous material supplied in compliance with applicable laws, including, but not limited to, the federal OSHA Hazard Communication Standards, 29 C.F.R. § 1926.59 and 29 C.F.R. §1910.1200 (when applicable). (ii) One copy of the related SDS must be provided with each shipment of any hazardous material. Failure to provide the SDS or proper labeling on the container(s) may result in the rejection of the shipment. Vendor shall be responsible for all shipping charges related thereto. A revised SDS must be submitted to HMGMA or its designated agent when there is a change in composition or when significant new information concerning hazards or ways to protect against hazards becomes known. All information spaces on the SDS must be completed. Do not use "N/A" in any block – use the terms "Not Applicable" or "No Information Available" if necessary. Vendor's name, HMGMA's contract and line item number must be entered at the top of the SDS. HMGMA has the right to use, duplicate, and disclose the data on the SDS. (iii) Vendor shall not dispose of any hazardous materials or similar type substances in any manner in violation of HMGMA's environmental policies, or any law, statute or regulation, and shall consult with HMGMA's environmental representatives prior to any such disposal. Neither the requirements of this Section nor any act by HMGMA shall relieve the Vendor of any responsibility or liability for the safety of HMGMA's personnel or property.

(d) Gratuities. Vendor has not offered or given and shall not offer or give to any employee, agent, or representative of HMGMA any gratuity or any kickback within the meaning of the Anti-Kickback Act of 1986, or any successor statutes, with a view toward securing any business from HMGMA or influencing such person with respect to the terms, conditions, or performance of any agreement with or purchase order from HMGMA. Any breach of this provision shall be a material breach of each and every agreement between HMGMA and Vendor.

(e) Employment Eligibility Verification. Vendor shall not knowingly employ, hire for employment, or continue to employ, or otherwise involve in the performance of the Order any individual whose identity is not verified, who is not authorized to work in the United States, and who is not of lawful age. Furthermore, Vendor will not knowingly allow any sub-Vendor, staffing agency, or other affiliated entity to employ or continue to employ any individual whose identity is not verified, who is not authorized to work in the United States, and who is not of lawful age. Vendor shall warrant that it is and will all times be in compliance with the Immigration Reform and Control Act (as amended), the Georgia Security and Immigration Compliance Act (as amended) and any accompanying or related federal, state, and local regulations and guidance. Vendor shall demonstrate this compliance by taking the following measures: (i) enroll in and consistently use the federal work authorization verification program commonly known as E-Verify or any subsequent replacement program (the "E-Verify program") and obtain a "work authorized case result" for all employees; (ii) require all employees involved in the hiring and onboarding of workers to complete regular training in matters pertaining to Form I-9 and E-Verify procedures and provide HMGMA proof of completion of said training upon HMGMA's request; (iii) require all employees involved in the hiring and onboarding of employees, and in the supervision and management of employees, to complete regular training in properly reviewing and verifying identification, work authorization, and proof of age documents, and provide HMGMA proof of completion of said training upon HMGMA's request; (iv) institute a means of communication to allow employees to report concerns about the work eligibility of anyone on HMGMA's premises, along with a procedure for evaluating and investigating those concerns; (v) perform an internal audit, at least once every calendar year, of its compliance

with the Immigration Reform and Control Act (as currently amended), the Georgia Security and Immigration Compliance Act (as currently amended) and all related regulations and guidelines, and certify the completion of such audit to HMGMA within 180 days of completion of such annual audit.

(f) Underage and Forced Labor. Vendor warrants that it is and will at all times be in compliance with all applicable federal, state, and local laws that prohibit underage labor or other exploitation of children in the manufacturing and delivery of goods to HMGMA, and consistent with the International Labor Organization's Minimum Age Convention of 1973. Vendor represents and warrants that neither it nor any of its subcontractors or suppliers, Staffing Agencies or any other affiliated entities shall utilize slave, prisoner or any other form of forced or involuntary labor in the manufacturing and delivery of goods to HMGMA. Vendor shall demonstrate its compliance with all applicable laws by taking the following measures: (i) ensure that all personnel involved in human resources, recruiting, employee relations, management, and supervision of employees, including personnel employed by subcontractors and suppliers, Staffing Agencies, and other affiliated entities, receive training in laws and regulations pertaining to underage and forced labor, as well as best practices for responding to suspicions of underage and forced labor issues affecting the manufacturing and delivery of goods to HMGMA; (ii) ensure that all employees, including employees of subcontractors and suppliers, Staffing Agencies, or other affiliated entities, receive access to information for reporting concerns related to underage or forced labor, and that Vendor implements a procedure for evaluating and investigating said concerns; (iii) place a stamp, or otherwise include language on all invoices for goods provided to HMGMA certifying compliance with child labor laws. The stamp shall state the following: We hereby certify that these goods were produced in compliance with all applicable requirements of sections 6, 7, and 12 of the Fair Labor Standards Act, as amended, and of regulations and orders of the United States Department of Labor issued under section 14 thereof. If Vendor receives notice that any worker on its premises, regardless of said worker's direct employer, may be underage and/or forced, or if Vendor learns of facts that would lead a reasonable person to infer that a worker on its premises may be underage and/or forced, Vendor will immediately investigate, document its findings and report to HMGMA in the event that said notice and/or facts are verified.

(g) Customs Requirements. If Vendor ships to the U.S. by ocean any goods to be incorporated in the Services, Vendor must meet the requirements set forth in this Section, so that HMGMA can comply with Section 203 of the Security and Accountability for Every (SAFE) Port Act of 2006 and the Importer Security Filing (a.k.a. "10+2") required by this Act. Vendor must provide via e-mail to HMGMA in connection with each ocean shipment to the U.S. under this Agreement the following information no later than ninety six (96) hours prior to the date of loading of any goods or any part thereof on a U.S. bound vessel: (i) name and address of manufacturer/supplier; (ii) name and address of container stuffing location; (iii) name and address of Vendor (seller/owner); (iv) name and address of consolidator (container stuffer); (v) name and address of buyer (importer); (vi) name and address of ship-to party; (vii) country of origin; (viii) commodity description/ Harmonized Tariff Schedule number; and (ix) bill of lading number. Vendor shall notify HMGMA immediately of any changes to the foregoing information prior to the goods' arrival in the U.S. Upon HMGMA's request, Vendor shall provide to HMGMA or the appropriate governmental agency any other documentation or information necessary to determine the admissibility and the effect of entry of the goods into the U.S. Vendor represents and warrants that the information supplied by Vendor to HMGMA hereunder is true and correct in every respect. Vendor shall indemnify, defend, and hold harmless HMGMA from any liquidated damages, monetary penalties, fines or forfeitures assessed (administratively or judicially) by any government agency in connection with Vendor providing, directly or indirectly, any false, inaccurate, or untimely information.

(h) Services on HMGMA's Premises. Whenever Vendor or its subcontractor or suppliers provide personnel for the performance of the Services on HMGMA's premises, the following provisions shall apply: (i) Vendor shall conduct background checks on all of its employees prior to their assignment to perform any Services at HMGMA. (ii) Vendor's personnel will, upon arrival at HMGMA, report to HMGMA's Safety Department and complete the Safety Orientation provided by the Safety Department. (iii) Vendor's personnel shall comply with HMGMA's Supplier Handbook and other rules, policies and procedures for on-site Vendors and for business invitees, including those pertaining to the use of HMGMA's facilities, which will be provided to Vendor during the Safety Orientation or earlier upon Vendor's request. (iii) Vendor represents and warrants that it has carefully examined the site where the Services will be performed, that Vendor fully understands the character, quality, and quantity of the Services to be performed, as well as the conditions that will be encountered at the site or otherwise affect the cost or difficulty in performing the Services, and that it has taken all such conditions into consideration before entering into this Agreement. (iv) Vendor

shall be responsible for the loss or damage to its property while on HMGMA's premises, and shall be responsible for the safety of its employees and agents. Vendor shall maintain its own safety policy or program. Vendor shall exercise proper precautions at all times for the protection of persons and property. (v) HMGMA is a drug-free workplace. HMGMA's policy is that all of its employees must be free from detectable amounts of controlled substances, or metabolites, without regard to impairment and that all employees must not be impaired by alcohol or drugs in the workplace. Vendor must adopt its own drug and alcohol program and policy with similar restrictions for its employees to follow while working on HMGMA's premises, including: a five panel (or higher) drug screen, random drug screening, post-accident testing, and require that its employees sign a consent for drug screen. HMGMA shall have the right to drug screen Vendor's employees at HMGMA's onsite medical facility following any injury or property damage incident at HMGMA involving those Vendor employees (i.e., post-accident drug screen). (vi) HMGMA shall have the right, at any time for any reason, to have removed from its premises any person, including any employee or agent of Vendor or its subcontractors and suppliers, and Vendor shall cause such employee or agent to be removed at Vendor's sole cost and expense.

(i) Minority-Owned, Women-Owned Business Enterprises. HMGMA is committed to include Minority-Owned Business Enterprises ("MBE") and Women-Owned Business Enterprises ("WBE") subcontractors in its projects. Vendor agrees to include both MBE and WBE as subcontractors in the performance of the Services, to the extent reasonably practicable. Vendor shall use reasonable efforts to have a minimum MBE participation equivalent to 15% of the contract price, and a minimum WBE participation equivalent to 5% of the contract price. If Vendor does not meet these minimum requirements, it shall demonstrate to HMGMA the efforts that were made to achieve these minimum participation levels. MBE and WBE who are subcontractors shall be certified by the National Minority Supplier Development Council and its regional affiliate councils or some other certifying agency approved by HMGMA. HMGMA shall have the right to approve any MBE or WBE. If HMGMA does not approve, Vendor shall provide a suitable replacement subcontractor or supplier without cost to HMGMA.

(j) HMGMA Business Partner Code of Conduct. Vendor acknowledges that it has received a copy of HMGMA's Business Partner Code of Conduct and shall comply with applicable policies.

**12. Independent Contractor.** Neither Vendor nor its subcontractors and suppliers, or their employees or agents, shall be deemed to be HMGMA's employees or agents. Vendor and its subcontractors and suppliers are independent contractors for all purposes of this Agreement. Vendor shall be solely and wholly responsible for withholding or payment of all federal, state, and local income and other payroll taxes with respect to its employees, including, contributions from them, as required by law.

**13. Subcontractors.** Nothing contained in this Agreement shall create any contractual relationship between HMGMA and any of Vendor's subcontractors and suppliers, nor shall the Agreement create any obligation on the part of HMGMA to pay or see that payment of any sums is made to any Vendor subcontractors and suppliers. Vendor shall utilize local (Georgia) subcontractors and local (Georgia) labor forces in the performance of the Services to the maximum extent possible.

**14. Requirement for Skilled Personnel.** When applicable, the attached Scope of Work shall set forth the necessary Services to be provided by skilled personnel. The Services shall include, but are not limited to: conducting technical meetings with HMGMA; consulting with and supporting HMGMA personnel during integration of machinery; consulting with and supporting HMGMA personnel during testing of equipment; consulting with and supporting HMGMA personnel during performance of modifications to any equipment sold under this Agreement; consulting with and supporting HMGMA personnel during quality review of any equipment sold under this agreement; providing HMGMA personnel with relevant training for operation and maintenance of machinery; and, conducting technical meetings with HMGMA personnel to receive acceptance of any equipment sold under this agreement. Vendor is solely responsible for locating, hiring (if not already employed by Vendor), and deploying personnel with adequate knowledge and skills to fulfill the terms of the Services. HMGMA acknowledges that U.S. Immigration law permits foreign visitors to perform certain services related to equipment installation and service and repair under limited circumstances. Vendor agrees that no foreign visitors will be used to fulfill the requirements of this Section 14 unless (i) said limited circumstances are fully met, (ii) Vendor strictly limits the activities of foreign

visitors to a scope that is compliant with U.S. immigration law, and (iii) all requirements contained in Paragraph 11 are strictly observed to the extent applicable.

15. **Liens.** To the fullest extent permitted by applicable law, Vendor hereby waives and releases any and all rights of mechanic's lien, materialman's lien, laborer's lien, and similar rights for payment for the Services, labor, equipment, or materials furnished by Vendor which Vendor may have against HMGMA's premises or property belonging to HMGMA or its agents. Vendor shall at all times promptly pay for all services, materials, equipment, and labor used by it in the performance of the Services and shall at its expense keep all HMGMA's property free and clear of any and all laborer's, mechanic's, materialman's, or other liens and rights of lien. If Vendor fails to release and discharge any such claim of lien against HMGMA's premises or property arising out of performance of the Services within five (5) working days after receipt of written notice from HMGMA to remove such claim of lien, HMGMA may, at its option, discharge or release the claim of lien or otherwise deal with the lien claimant, and Vendor shall pay HMGMA any and all costs and expenses of HMGMA in so doing, including attorney's fees incurred by HMGMA. HMGMA reserves the right to pay any outstanding past due obligation of Vendor arising from the Services by check made payable jointly to Vendor and its subcontractors. Vendor agrees to furnish, if and when requested by HMGMA, lien waivers and affidavits that all bills for materials and labor have been paid. Such affidavits shall be supported by receipted bills, if required by HMGMA. Prior to final payment by HMGMA, Vendor shall furnish HMGMA with a final waiver and release of all liens and claims, together with any affidavits that HMGMA may request, on forms satisfactory to HMGMA.

16. **Protection of Work and Risk of Loss.** Vendor shall preserve and protect the material and equipment it uses in the performance of the Services from damage or loss. HMGMA shall not be responsible for any loss suffered by Vendor or damage to the material and equipment utilized and provided by Vendor in the course of providing the Services or damage to materials, tools, and equipment of Vendor and its subcontractors and suppliers. Vendor assumes responsibility for any such loss or damage and for any cost of repairing, making good, or replacing any such loss or damage. Vendor shall also, at its own expense, promptly repair, restore, or replace any property of HMGMA or its subcontractors and suppliers, which Vendor, or Vendor's subcontractors or suppliers, may damage, destroy, or lose.

17. **Force Majeure.** In the event that either party is unable to perform its duties under this Agreement for reasons beyond its reasonable control, including acts of God, acts of government, or military authority, epidemics, war, terrorism, riots, or other similar causes, which the party could not have reasonably foreseen or provided against ("**Force Majeure Event**"), the party so affected shall give immediate written notice to the other party within three (3) days of such Force Majeure Event, with a description and estimated duration of the Force Majeure Event occurrence. The effects of the Force Majeure Event shall, so far as possible, be remedied with all reasonable dispatch, and the party giving notice shall use its best efforts to eliminate and mitigate the consequences thereof. The time for performance may, in HMGMA's sole discretion, be extended for a period equal to the time performance is delayed by the Force Majeure. Under no circumstances shall a labor dispute, strike, lockout, shortage of labor, lack of financial resources, or inability to obtain materials or supplies constitute a Force Majeure Event. If a Force Majeure Event continues for more than thirty (30) days, or makes performance under the Agreement impossible, the other Party may terminate this Agreement immediately upon written notice. In the event of such termination, any amounts prepaid by HMGMA for Services not yet rendered will be reimbursed by Vendor to HMGMA within thirty (30) days of the date of the termination notice.

18. **Governing Law and Dispute Resolution.** The laws of the State of Georgia, without regard to the conflict of law principles, govern all matters arising under this Agreement. Vendor and HMGMA shall bring any proceeding arising out of this Agreement only in the appropriate state or federal court of jurisdiction in Bryan County, Georgia. Each party hereby submits to the exclusive jurisdiction of these courts for purposes of any such proceeding and waives any claim that the venue of that proceeding is improper. HMGMA, at its sole option, may also invoke binding and exclusive arbitration with respect to any dispute under this Agreement in Bryan County, Georgia, under the American Arbitration Association's Commercial Arbitration Rules. HMGMA and Vendor expressly waive any right

they may have to a trial by jury in any legal proceeding commenced by either party in connection with this Agreement and shall try any proceeding exclusively by a court without a jury. Each party waives any right to have a jury trial in any proceeding for any defense, claim of set-off, claim of recoupment, counterclaim, or third-party action. HMGMA and Vendor specifically acknowledge that their execution of this Agreement with the waiver of jury trial is a material inducement for their entering into this Agreement.

**19. Notices.** All notices, demands, requests, or other communications under this Agreement shall be given in writing and shall be deemed to have been given if delivered by hand, certified mail, or nationally recognized overnight delivery service, freight prepaid, effective upon receipt (or refusal to accept delivery) of such notice, demand, request, or other communication. Notices shall be addressed as follows:

if to HMGMA:	Hyundai Motor Group Metaplant America, LLC Attention: Mary Jo Press, Chief Safety Officer 1500 Genesis Drive Ellabell, GA 31308
with a copy to:	Attention: Chris Smith, Chief Project Implementation Officer & General Counsel 1500 Genesis Drive, Ellabell, Georgia 31308 Email: <a href="mailto:Christopher.smith@hmgma.com">Christopher.smith@hmgma.com</a>
if to Vendor:	Hyundai Materials Savannah, Inc. Attention: Chief Executive Officer 101 W Mulberry Blvd. Ste 220 Savannah, GA 31407

**20. Assignment.** Vendor shall not assign any rights or delegate any duties under this Agreement without the prior written consent of HMGMA, except that this Agreement shall inure to the benefit of both HMGMA's and Vendor's permitted successors and assigns.

**21. Amendment; Waiver.** No amendment or waiver of any of the provisions of this Agreement shall be effective unless made in writing and signed by both parties. HMGMA's failure at any time to enforce, or its delay in the enforcement of, any provision of this Agreement or any right with respect thereto, or its failure to exercise any option herein provided, shall in no way be construed as a waiver of such provision, right, or option or affect the validity of this Agreement.

**22. Severability.** If any provision of this Agreement is unenforceable to any extent, such unenforceability shall not affect the rest of this Agreement. The Parties shall replace such provision with equivalent provisions, the commercial effect of which shall be as similar as possible to the unenforceable provisions.

**23. Survival of Obligations.** The provisions of this Agreement that by their sense and context are intended to survive the termination of this Agreement, the Services or HMGMA's acceptance of the Services (including Sections on warranty, confidentiality, and indemnity) shall survive such termination or acceptance.

**24. Entire Agreement.** This Agreement together with exhibits constitutes the entire agreement of the parties relating to the subject matter of this Agreement and supersedes all other oral or written agreements. No course of dealing, no usage of trade, and no course of performance shall supplement, explain, or amend any term, condition, or instruction of this Agreement. HMGMA rejects any additional or different terms set forth in any document of Vendor, unless and to the extent HMGMA has expressly agreed to any such term.

25. **Counterparts.** The parties may sign this Agreement in counterparts, each of which shall be deemed an original, but all of which together shall constitute one instrument.

The parties are signing this Agreement on the date stated in the introductory clause.

**EXHIBIT A**  
**SCOPE OF WORK**

This Scope of Work (the "**SOW**") is between Hyundai Motor Group Metaplant America, LLC ("**HMGMA**"), and Hyundai Materials Savannah, Inc., ("**Vendor**") and is dated and effective as of October 1, 2024 pursuant to the Service Agreement by and between HMGMA and Vendor which incorporates this SOW therein. Capitalized terms not defined in this SOW have the meanings ascribed to them in the Agreement. Terms defined in the singular have the same meaning in the plural and vice versa.

Vendor agrees to provide the Services to HMGMA for the management, collection and removal of waste from HMGMA's premises as follows.

**1. General Scope of Services.**

Vendor shall conduct daily site inspections, removal, and disposal of waste areas and containers under their supervision. Waste handlers and/or subcontractors shall properly record and manifest their removal/disposal in order to keep an updated record of waste management activities. Vendor shall also provide the following:

- a. Provide empty roll-off containers for Waste (Class C/D) collection.
- b. Provide removal/return service of loaded/empty roll-off containers.
- c. Provide service on a pre-scheduled basis.

Vendor will remove waste when bins are determined to be full during their daily site inspections. HMGMA may also make specific requests for bin swapping as necessary. HMGMA may request additional bins should the turnaround rate for bins be insufficient to manage the waste being generated. Vendor shall be responsible for providing appropriate signage and delineation markers for all materials furnished by Vendor on site. Vendor shall be responsible for managing its subcontractors and abiding by all established site, local, state, and federal environmental, health, and safety policies, rules, and regulations.

**2. Vendor Obligations.**

- a. **General**. Vendor shall provide the Services (i) in accordance with the terms and subject to the conditions set forth in the Agreement; (ii) use personnel of required skill, experience, and qualifications; (iii) in a timely, workmanlike, and professional manner; and (iv) in accordance with generally recognized industry standards in Vendor's field.
- b. **Representative**. Vendor shall designate one (1) or more of its employees as representative(s) to coordinate, manage, and oversee the Services provided to HMGMA.
- c. **Records**. Vendor shall maintain full, complete and separate financial, statistical and accounting records and accounts, pertaining to the Services and payments to HMGMA. Vendor shall maintain such records for a period of not less than six (6) years following the close of each of Service Provider's fiscal years.

**3. HMGMA Obligations.**

- a. **Waste Materials**. The materials to be collected under this Agreement shall be only Waste Materials as defined herein. All solid waste only containers shall be properly demarcated by Vendor. HMGMA and its contractors shall ensure that scrap metal is delivered to the appropriate bins, dumpsters, and/or trailers for disposal. Vendor shall haul all general waste from the site to an established disposal facility. Vendor shall provide HMGMA with a list of ultimate end disposal facilities and make a preference for sustainable disposal practices, such as reuse or recycling where feasible. General waste shall be defined as waste except hazardous waste and food waste. In any circumstance, hazardous waste and food waste are not to be

disposed of in the general waste bins. Title to Waste Materials provided by HMGMA is transferred to Vendor upon Vendor's receipt or collection unless otherwise provided in this Agreement or applicable law.

- b. Special Waste. For purposes of this Agreement, Waste Materials includes Special Waste, such as industrial process waste, asbestos-containing material, petroleum contaminated soils, treated decharacterized wastes, and demolition debris, but HMGMA shall complete a Waste profile for such Special Waste which has been approved by HMGMA in writing.
- c. Excluded Materials. Waste Materials specifically excludes, and HMGMA agrees not to deposit or permit the deposit for collection of any waste tires, radioactive, volatile, corrosive, flammable, explosive, biomedical, infectious, bio-hazardous, regulated medical or hazardous waste, toxic substance or material, as defined by characterized or listed under applicable federal, state or local laws or regulations, or Special Waste not approved in writing by HMGMA (collectively, 'Excluded Materials'). Title to a liability for Excluded Material shall remain with HMGMA at all times.
- d. All "solid waste only" containers shall be properly demarcated by Vendor. HMGMA and its Vendors shall ensure that scrap metal is delivered to the appropriate bins, dumpsters, and/or trailers for disposal. Any material of value placed inside of waste bin will be considered waste. Hyundai Materials is not financially responsible for valued scrap being discarded in waste bins instead of the appropriate disposal location.
- e. Access to Facilities; Safety. HMGMA shall grant Vendor reasonable access to its manufacturing facilities for the purpose of performing the Services. HMGMA shall implement necessary safety measures to protect Vendor's personnel during waste collection and disposal activities, including providing adequate signage/hazard communication on the handling of hazardous materials. HMGMA will allow Vendor supervised visits to the place that the waste material is generated and/or stored and will allow Vendor to collect the material in various sizes for the evaluation, but only to the extent necessary to comply with applicable law in the performance of the Services.

4. **Equipment.**

- a. Definition of Equipment. The word "Equipment" as used herein shall mean all containers used for the storage of waste or recycle material including Stationary Compactor Units, Stationary Bailing Units, Waste Material Loading Devices, Trucks and Trailers, Cranes, Tanks and such other onsite devices as may be specified.
- b. HMGMA Duties for Vendor Equipment. The Equipment provided by Vendor is for Vendor's convenience in providing the Services under the Agreement. HMGMA shall be responsible for the cleanliness and safekeeping of the Equipment. HMGMA shall not make any alterations or improvements to the Equipment without prior written consent of Vendor. HMGMA warrants that the Equipment will only be filled level to the top of the Equipment and will not be otherwise overloaded. HMGMA shall be liable to Vendor for any overweight fines caused by Equipment overload. HMGMA shall not use the Equipment for incineration purposes and shall be liable to Vendor for loss or damage to the Equipment in excess of reasonable wear and tear. On collection day, Vendor's vehicle shall have clear access to the Equipment. If the Equipment is blocked so as to prevent collection by Vendor, HMGMA will be notified to move the obstacle.
- c. All Equipment furnished by Vendor for use by HMGMA which HMGMA has not purchased shall remain the property of Vendor and HMGMA shall have no right, title or interest in Equipment.

**EXHIBIT B**  
**FEE SCHEDULE**

Waste handlers and/or subcontractors of Vendor shall properly record their removal/disposal in order to keep an updated record of waste management activities at HMGMA. All collection tickets shall be provided to HMGMA at the time of invoice for verification prior to the issuance of payment by HMGMA.

Service Item	Price Per Haul	Rental Fee	Landfill Per Ton
Waste Bin Service (8YD)	\$150.00 / load	-	-
Dumpster Service (30YD)	\$300.00 / load	-	\$60.00 / ST
Compactor (Rental)	\$300.00 / load	\$2,000 / month	\$60.00 / ST
Auger (Rental)	\$300.00 / load	\$5,000 / month	\$60.00 / ST

Additional worker costs incurred when working on weekends (Saturday to Sunday) shall be agreed upon in writing prior to the work being performed.

Michelle,

I am attaching the remainder of the collection tickets, the files were too large to send all at once.

Thanks,

Reid Dieringer

Subject: RE: Hyundai Plant- Manifests Process Wastewater

Good afternoon Michelle,

In follow-up to your recent request for all process wastewater manifests, please see attached. The process wastewater is transferred to tanker trucks to be hauled off site for disposal. HMGMA has contracted with Hyundai Materials for waste management. Hyundai Materials is responsible for managing the transfer of the wastewater to the trucks and for disposal. Per our agreement with Hyundai Materials (copy attached for reference), when the waste is transferred to Hyundai Materials' possession, they are responsible for the proper disposal. The attached collection tickets dated from 10/10/24, document the transfer of the wastewater to Hyundai Materials. The collection tickets show the transfer of responsibility for the process wastewater from HMGMA to Hyundai Materials as the tanker trucks exit the HMGMA security gate. We have been in contact with Hyundai Materials about your request and they should be able to provide you with the manifests showing where the wastewater was disposed or direct you to the appropriate vendors managing disposal on their behalf. Some of these documents were brought to the HMGMA site for your review in person and were returned to Hyundai Materials possession afterwards.

The Agreement and waste removal process with Hyundai Materials is still in the implementation phase and we have been using the collection tickets as a gap-fill until the agreement procedure /forms are memorialized and approved by both parties. We intend to have a more detailed form showing the contents of waste being transferred to Hyundai Materials, along with the appropriate acknowledgments related to disposal of the waste in accordance with the Agreement and applicable law. Is there any specific information you would like to see on these forms to ensure we are documenting the activities appropriately? We can discuss this matter further at your convenience – or if you would like to see the final form before it is approved, please let me know.

Best regards,

Reid Dieringer

Michelle,

I hope this email finds you well. I am writing to provide an update on the information you requested regarding all process wastewater manifests. We are actively working toward gathering the necessary details, but due to the holiday season, there have been some delays due to the holiday season. I appreciate your understanding and patience during this time. If you have any questions or need any interim updates, feel free to reach out.

Thank you for your attention to this matter.

Mazen and Hyun,

During my last visit to the facility, we spoke about all process wastewater manifests being sent to me. Please send them as soon as possible to this email address. The manifests that should be included is everything that has been pumped and hauled since City of Savannah has cut off the main discharge. Please let me know if you have any questions.

1050 Canal Road Brunswick, GA 31525450

RE: Letter of Concern

Dear Michelle:

HMGMA is providing this response to the Letter of Concern issued on December 6<sup>th</sup>, 2024, regarding the disposal of industrial process wastewater from the facility at various publicly owned treatment works (POTW) in Georgia. The following was requested, and has been provided in this response:

1. Information regarding the quantity and characteristics of the wastewater that is being transported offsite to POTWs. Shipping manifests and laboratory sample results are included.
  - **Please see attached. Please note that only one POTW in Georgia received any process wastewater, the rest are private companies at facilities in other states.**
2. A list of the facilities utilized by the company for final disposal of industrial wastewater generated at the facility.
  - **HMGMA uses Hyundai Materials for pumping & hauling of non-hazardous wastewater. Hyundai Materials has utilized the following companies below for treatment from September 2024 to present day.**
    1. Liquid Environmental Solutions
    2. ReWorld
    3. Huggins/ City of Richmond Hill
      - \*As of November 4<sup>th</sup>, 2024, the use of Huggins and The City of Richmond Hill Wastewater Treatment Plant have been discontinued.
    4. Archoma
    5. Shamrock
    6. US Water Recovery
3. The volume of wastewater and industrial stormwater (gallons per day) disposed from September 2024 to present day at each receiving facility.
  - **Please see attached Pump & Haul Totals Excel Spreadsheet**
4. A description of interim and long-term plans for disposal of the facility's industrial wastewater
  - Interim Plan**
    - Continued use of Hyundai Materials for wastewater pump & haul of wastewater.
  - Long-term Plan**
    - Installation of pretreatment equipment and verification of consistently meeting Bryan County/ City of Savannah requirements stated in the joint memorandum to restart discharge of wastewater to their POTW facilities using the sanitary sewer system.

HMGMA is continuing to track and monitor the disposal of all industrial process wastewater and conformance with regulatory requirements.

Please review this information and let us know if you have any questions or if we can be of further assistance in this inquiry.

Sincerely,

Jordan Blazer  
Sr. Manager, Head of EHS Department

1. Official business name: **Liquid Environmental Solutions LLC**
2. E.P.A Number: **981 928 484**
3. The amount of Gallons have been disposed of each month at your facilities since September 2024 until December.

September – 0 Gallons – not applicable

October – 0 Gallons – not applicable

November – 319,296 Gallons

December (thru the 10th) – 211,820 Gallons

4. Please clearly state that you tested the water with a tanker, and you have accepted taking our water.

**We picked up a trial load November 6th 2024 to run through testing and treatability. All results were acceptable to receive the waste stream**

5. Waste Profile – attached

Regards,

WASTE QUESTIONNAIRE (CHECK ALL THAT APPLY)

Non-hazardous Waste

1. Is this material a hazardous waste (F, K, U, or P listed) as defined by 40 CFR 261 Subpart D? If yes to the above, identify the listing.

YesNoUnknown

2. Has this material been mixed with a hazardous waste as defined by 40 CFR 261?

3. Does this material exhibit any of the following hazardous waste characteristics?

Ignitability? (40 CFR Part 261.21)

Corrosivity? (40 CFR Part 261.21)

Reactivity? (40 CFR Part 261.21)

Toxicity? (40 CFR Part 261.21)

4. Does this material contain?

Herbicides, pesticides, insecticides?

Dioxins?

Radioactive substances?

Domestic Wastes?

Biohazardous materials?

5 Is the waste derived from an underground storage tank (UST)?

6. If waste is derived from fuel, is the fuel leaded?

Used Oil (as defined by CFR 279.1)

1. Is this material Used Oil as defined by 40 CFR 279?

2. Has this Used Oil been mixed with hazardous waste?

3. Is the source of the waste a Conditionally Exempt Small Quantity Generator?

4. Does this Used Oil contain chlorinated paraffins? If yes, attach MSDS

5. Does this Used Oil contain TSCA (40 CFR 761) regulated levels of PCB? If yes, list PCB level:

6. Does this Used Oil contain less (<) than or equal to 1,000 mg/L Total Organic Halogens (TOX)? \* If no, rebuttal per 40 CFR 279.10(b)(1)(ii) must be included.

7. Is this Used Oil soluble in water?.....

Is this a virgin or off-spec product? (If Yes, must include MSDS)

1. Unused Product or Chemical

2. Waste by-product from process

3. Spill Clean Up

4. Planned Site Remediation

5. Representative Sample Provided.

Petroleum Contact Water (PCW)/Leaking

Underground Storage Tank (LUST) Water

Is the generator a Conditionally Exempt Small Quantity Generator (CESQG)?

Does this waste contain oils, lubricants, coolants or petroleum products

GENERATOR CERTIFICATION AND GUARANTEE - PLEASE READ AND SIGN BELOW

As the generator of the material (waste) described above, I certify that I have provided all relevant information as required by this profile and that the information provided is, to the best of my knowledge and belief, true, accurate and complete. Generator agrees not to deliver or arrange for delivery of any material that does not conform to the waste characterization contained in this profile. I further certify that this material is not a RCRA hazardous waste pursuant to federal, state or local laws and has not been mixed with any chlorinated solvents or any other contaminants including, without limitation, PCBs, pesticides, or other hazardous wastes. If Liquid Environmental Solutions (LES) accepts the material for processing and the material is later determined by LES or any other person to be or contain hazardous waste within the meaning of any federal, state or local law, or contain PCBs in sufficient quantity to render it a TSCA-regulated material, the generator agrees to pay all costs incurred by LES to properly treat, store, dispose or otherwise handle the material and any fines and penalties resulting from LES's handling of generator's material. Generator agrees to promptly notify LES of any change in the composition of the material or process generating the material, and agrees to provide LES with a new Uniform Waste Profile prior to delivering any material to LES that does not conform to the waste characterization contained in this profile. The undersigned is an authorized representative of the generator.

# HUGGINS WASTE SERVICES

**Industrial**

**Commercial**

**Residential**

**912-677-0426**

***hugginswaste@gmail.com***

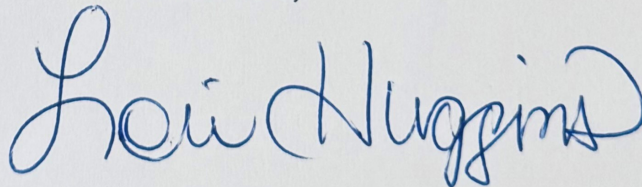

December 11, 2024

To whom this may concern,

Huggins Waste Services was hired to pump and haul wastewater from the Hyundai Materials Plant in Ellabell, Ga. Prior to hauling any wastewater Huggins Waste solidified a disposal site.

Huggins Waste contacted a local disposal municipal. The City of Richmond Hill Wastewater Treatment Plant was allowed to take a sample of the wastewater from the Hyundai Materials Plant for the analysis of the product. The lab testing was performed prior to agreeing to accept any loads. This process took approximately one week. Once the results of the sampled water were obtained The City of Richmond Hill Wastewater Treatment Plant, agreed to accept up to 60gal of this wastewater per day. Huggins Waste then proceeded to pump wastewater from the Hyundai Materials Plant, which was hauled then disposed at The City of Richmond Hill Wastewater Treatment Plant. Huggins Waste provided a work order along with a manifest for every load hauled and disposed. The date, the number of gallons pumped and a signature from the disposal site are recorded on each manifest.

Thank You,

A handwritten signature in blue ink that reads "Lori Huggins". The signature is fluid and cursive, with the first name "Lori" and last name "Huggins" clearly distinguishable.

Lori Huggins  
Vice-President

HUGGINS WASTE SERVICES

# Local Governing Authority Commercial Waste Haulers Permit

*Is hereby granted to:*

*Huggins Waste Services*

Truck # 001 with tag #GJA220 has been issued a Commercial Waste Transporter Permit # FOG400-001. This permit authorizes this truck to remove commercial waste in the State of Georgia and dispose of said waste at only approved locations that accept this waste from the above company.

*Transporter has advised the following location(s) for disposal.*

Huggins Waste Services  
71 Horsetrail Rd.  
Pooler, GA 31322

This permit is valid for the State of Georgia

**Issuance Date: November 6, 2024**

**Expiration Date: November 5, 2025**

## ARCHROMA PROFILE SUMMARY SHEET

Profile Number	
----------------	--

### I. Generator Information

Generator Name	Hyundai Motor Group Meta Plant America (HMGMA)
Physical Address	1500 Genesis Dr.
City, State, Zip Code	Ellabell, GA 31308
Mailing Address	330 Kona Dr.
City, State, Zip Code	Ellabell, GA 31308
Phone Number	(678) 827-1693
Fax Number	N/A
EPA ID Number	N/A
Primary Contact	Jhonny Basmaji
Site Business Description	Vehicle Manufacturing Facility
SIC Code(s) of Facility	

### II. Billing Information

Customer	Green Rock Strategies, LLC
Address	1640 Meeting St. Rd., Ste 205
City, State, Zip Code	Charleston, SC 29405
Contact Name	Raymond Lightfoot
Phone Number	(502) 803-1733
Fax Number	N/A

### III. Waste Description

Waste Name	Non Regulated Wastewater
Description of Process Generating Waste	The cars get rinsed before painting. The water then gets transferred into the onsite water treatment plant for treatment. The treatment matches the water process within the limits of the City of Savannah. The water then goes to the holding station the City maintains. The city is having issues with their holding station and cannot continue to accept the water entirely.
SIC Code(s) Associated with the Generation of this Waste Stream	
EPA Waste Code(s)	N/A

### IV. Waste Characteristics

Physical State	<input type="checkbox"/> Solid	<input checked="" type="checkbox"/> Liquid	<input type="checkbox"/> Sludge
Layering	<input checked="" type="checkbox"/> None Multilayer	<input type="checkbox"/> Bilayer	<input type="checkbox"/>
Viscosity	<input checked="" type="checkbox"/> Low	<input type="checkbox"/> Medium	<input type="checkbox"/> Thick
Specific Gravity			
Flash Point	<input type="checkbox"/> None	<input type="checkbox"/> < 140°	<input checked="" type="checkbox"/> > 140°F

pH Range	7 to 9
Odor (visual observation)	None
Color (visual observation)	Clear

DOT Shipping Name	N/A
Hazard Class	N/A
UN/NA Number	N/A

## X. Certification

Customer certifies that no Waste Materials delivered to Archroma shall meet criteria to be classified as a Hazardous Waste under State or Federal Regulations. Customer certifies that no Waste Materials delivered to Archroma shall have originated from processes that cause the wastewater to be classified as “affected wastewater” subject to any Maximum Control Technologies (MACT) standard(s) as defined under the Clean Air Act.

I certify under penalty of law, that this document, and all attachments were prepared under my direction and supervision in accordance with a system designed to assure the qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person(s) who manage the systems, or those persons directly responsible for gathering information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Re: Monthly Wastewater Receipts  
1685 Oracal Parkway; Ellabelle, GA 31308

Dear Mr. Basmaji:

Per your request Shamrock Environmental Corporation is pleased to provide you with facility and monthly volume information regarding the wastewater tested, accepted and treated under Approval 2024-5447 (a copy of the profile is provided as a separate attachment).

1. OFFICIAL COMPANY NAME:

- A. Shamrock Environmental Corporation  
6106 Corporate Park Drive  
Browns Summit, NC 27214
- B. AquaTerra, a Shamrock Environmental Corporation Company  
710 Moore Street  
Oxford, GA 30054

2. EPA ID NUMBER:

- A. Shamrock Browns Summit, NC - NC0000942144
- B. AquaTerra Oxford, GA - GAR000010645

3. VOLUMES RECEIVED BY MONTH:

*September Loads:*

- A. Browns Summit NC - Not Applicable
- B. Oxford GA - Not Applicable

*October Loads:*

- A. Browns Summit NC - 119,724 gallons
- B. Oxford GA - Not Applicable

*November Loads:*

- A. Browns Summit NC Location A - 309,954 gallons
- B. Oxford GA Location B - 739,785 gallons

**Report Printed:** 10/17/2024  
**Work Order #** 24J0426  
**Project:**  
EOM Public Works, LLC

S24J165

**Notes and Definitions**

U	Indicated that the compound was analyzed for but not detected. This shall be used to indicate that the specific component was not detected. The value associated with the qualifier shall be the laboratory method detection limit.
J3	The matrix spike recovery outside method acceptance limits indicating matrix interference.
D1	Dilution needed due to matrix interference or foamy matrix
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the detection limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference
N.O.O.	No Odor Observed
REP	Field parameter measured by client
V	Indicated that the analyte was detected in both the sample and the associated method blank.
I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
Z	Too many colonies were present for accurate counting.
SUB	Work performed by outside (subcontracted) labs denoted by SUB in analyst field.

QC=Qualifier Codes as defined by DEP 62-160

Unless indicated, soil results are reported on actual (wet) weight basis.

The Color SM2120B method is reported as (Color / pH)

Legionella analyzed under CDC accreditation program

Dilution factors  $\geq 1000$  are abbreviated using k=1000 and M=1000000

Field parameters are not NELAP accredited.

Results relate only to this sample.

Reid Dieringer, Environmental Specialist, EHS  
Hyundai Motor Group Metaplant America, LLC  
131 Hutchinson Island Road  
Savannah, GA 31421  
Email: Reid.Dieringer@hmgma.com

**RE: Letter of Concern**

Hyundai Motor Group Metaplant America, LLC  
Bryan County

Dear Reid Dierenger,

The Georgia Environmental Protection Division (Division) recently received information that industrial process wastewater generated at Hyundai Motor Group in Ellabell, Georgia is being transported from the facility and disposed of at various publicly owned treatment works (POTW) in Georgia. The Division is concerned that an industrial pretreatment may be required for this activity and is requesting additional information regarding the alleged disposal of industrial process wastewater from the facility.

The company is classified as a categorical, significant industrial user under "Metal Finishing" and is subject to 40 CFR 433, Subpart A. According to the Georgia Rules for Water Quality Control, Chapter 391-3-6-.08, "Pretreatment and Permit Requirements", a facility subject to categorical pretreatment standards under 40 CFR 403.6 and 40 CFR chapter I, subchapter N is, by definition, a Significant Industrial User (SIU). Be advised that any industrial user with indirect discharge to a POTW in the state of Georgia will be considered for an industrial pretreatment permit from the Division for such discharge for each POTW receiving the industrial wastewater.

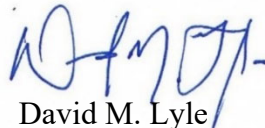

The Division is requesting that the company provide the following information within (30) days of receipt of this letter:

1. Information regarding the quantity and characteristics of the wastewater that is being transported offsite to POTWs. Shipping manifests and laboratory sample results should be included.
2. A list of the facilities utilized by the company for final disposal of industrial wastewater generated at the facility.
3. The volume of wastewater and industrial stormwater (gallons per day) disposed from September 2024 to the present day at each receiving facility.
4. A description of interim and long term plans for disposal of the facility's industrial wastewater.

Reid Dieringer  
Hyundai Motor Group Metaplant America, LLC.

Hyundai Motor Group Megaplant America, LLC  
131 Hutchinson Island Road  
Savannah, GA 31421  
VIA Email: Jordan.Blazer@hmgma.com

RE: **NOTICE OF VIOLATION**  
Hyundai Motor Group  
Bryan County

Dear Mr. Blazer,

The Georgia Environmental Protection Division (EPD) has been in communication recently with Hyundai Motor Group regarding the industrial process wastewater generated at the Hyundai Motor Group in Ellabell, Georgia being transported from the facility and disposed of at publicly owned treatment works (POTW) in Georgia. This letter is being sent to notify the company of alleged violations of the Georgia Water Quality Control Act, O.C.G.A. § 12-5-20 *et seq.* and the Georgia Rules for Water Quality Control, Chapter 391-3-6 at the referenced facility.

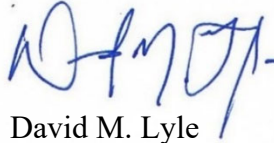

According to the company's letter dated January 3, 2025, industrial wastewater generated at the Hyundai Motor Group facility has been transported from the facility and disposed at publicly owned treatment works (POTW) located in Georgia. After further review, EPD has determined that the company should have secured an industrial pretreatment permit prior to disposing of the wastewater at a POTW. The company is classified as a categorical, significant industrial user under "Metal Finishing" and is subject to 40 CFR 433, Subpart A. According to the Georgia Rules for Water Quality Control, Chapter 391-3-6-.08, "Pretreatment and Permit Requirements", a facility subject to categorical pretreatment standards under 40 CFR 403.6 and 40 CFR chapter I, subchapter N is, by definition, a Significant Industrial User (SIU). According to 40 CFR 403.8(f), all SIU's must have a control mechanism to discharge to a POTW. When EPD is the control authority, the control mechanism is an individual permit. Further, each POTW's treatment, permit, and receiving waterbody are different, and the company would need an individual permit for each POTW that receives the industrial wastewater.

To address these violations, the Division requests a meeting with Hyundai Motor Group at the facility in Ellabell, on February 4, 2025, at 10am to discuss the details of this matter. Be advised that continued noncompliance could result in additional enforcement action by the Division including the imposition of monetary penalties.

Mr. Jordan Blazer  
January 24, 2025

**CAUTION:** This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon Michelle,

In follow-up to your recent request for all process wastewater manifests, please see attached. The process wastewater is transferred to tanker trucks to be hauled off site for disposal. HMGMA has contracted with Hyundai Materials for waste management. Hyundai Materials is responsible for managing the transfer of the wastewater to the trucks and for disposal. Per our agreement with Hyundai Materials (copy attached for reference), when the waste is transferred to Hyundai Materials' possession, they are responsible for the proper disposal. The attached collection tickets dated from 10/10/24, document the transfer of the wastewater to Hyundai Materials. The collection tickets show the transfer of responsibility for the process wastewater from HMGMA to Hyundai Materials as the tanker trucks exit the HMGMA security gate. We have been in contact with Hyundai Materials about your request and they should be able to provide you with the manifests showing where the wastewater was disposed or direct you to the appropriate vendors managing disposal on their behalf. Some of these documents were brought to the HMGMA site for your review in person and were returned to Hyundai Materials possession afterwards.

The Agreement and waste removal process with Hyundai Materials is still in the implementation phase and we have been using the collection tickets as a gap-fill until the agreement procedure/forms are memorialized and approved by both parties. We intend to have a more detailed form showing the contents of waste being transferred to Hyundai Materials, along with the appropriate acknowledgments related to disposal of the waste in accordance with the Agreement and applicable law. Is there any specific information you would like to see on these forms to ensure we are documenting the activities appropriately? We can discuss this matter further at your convenience – or if you would like to see the final form before it is approved, please let me know.

Best regards,

Reid Dieringer

**Subject:** RE: Hyundai Plant- Manifests Process Wastewater

Michelle,

I hope this email finds you well. I am writing to provide an update on the information you requested regarding all process wastewater manifests. We are actively working toward gathering the necessary details, but due to the holiday season, there have been some delays due to the holiday season. I appreciate your understanding and patience during this time. If you have any questions or need any interim updates, feel free to reach out.

Thank you for your attention to this matter.

**Subject:** Hyundai Plant- Manifests Process Wastewater

Mazen and Hyun,

During my last visit to the facility, we spoke about all process wastewater manifests being sent to me. Please send them as soon as possible to this email address. The manifests that should be included is everything that has been pumped and hauled since City of Savannah has cut off the main discharge. Please let me know if you have any questions.

Re: Georgia Open Records Act request for documents related to **wastewater received from the Hyundai Motor Group Metaplant America at the Bryan County Megasite.**

Dear Sir or Madame:

Ogeechee Riverkeeper ("ORK") submits this revised request under the Georgia Open Records Act, O.C.G.A. §§ 50-18-70 to -77 (GORA) for any and all documents and records in the possession of the City of Savannah (the "City") related to the City's reception of wastewater from the Hyundai Motor Group Metaplant America (HMGMA) at the Bryan County Megasite between January 1, 2024 and the present day.

Specifically, ORK requests:

- All reports (whether weekly, monthly, or otherwise) detailing the volume, contents, or other required details of the wastewater sent to the City of Savannah's wastewater treatment facilities, submitted to the City by the Hyundai Motor Group or any of its contractors or assignees responsible for transmission of the wastewater,
- All sampling or testing data submitted by Hyundai to City detailing the contents of the incoming wastewater stream from HMGMA to the City of Savannah's wastewater treatment facilities,
- All sampling or testing data undertaken by the City detailing the contents of the incoming wastewater stream from HMGMA to the City of Savannah's wastewater treatment facilities,
- The pretreatment permit issued to HMGMA prior to discharging to the City's wastewater treatment facilities,
- Any and all violations issued to HMGMA related to its wastewater transmission and discharge to the City's wastewater treatment facilities,

For the purposes of this request, the term “records” includes all written, printed, recorded or electronic materials, communications, correspondence, emails, surveys, comment cards, memoranda, notations, copies, permits, diagrams, charts, maps, plans, photographs, tables, spreadsheets, directives, observations, impressions, contracts, letters, messages, and mail in the possession or control of Liberty County, any of its departments in final or draft form, and should be construed as broadly as possible.

Ogeechee Riverkeeper is prepared to pay reasonable search and retrieval fees if necessary. Should your estimate of those fees exceed \$100.00, please advise us of the costs before they are incurred. We request that all records compiled pursuant to this request be either 1) made available to me for review and collection, 2) sent to the address above, or 3) if available electronically, sent by email to [ben@ogeecheeriverkeeper.org](mailto:ben@ogeecheeriverkeeper.org).

If this request is denied in whole or in part, we ask that you justify all deletions by references to specific exemptions of GORA. *See* O.C.G.A. § 50-18-71(d). We also ask that you release all segregable portions of otherwise exempt material, per O.C.G.A § 50-18-72(b).

Additionally, this revised request should replace ORK’s previous records request submitted on June 23, 2023 on the same subject matter.

Thank you for your assistance in this matter. Should you have any questions, please contact me by phone at 866-942-6222 x9, or email at [ben@ogeecheeriverkeeper.org](mailto:ben@ogeecheeriverkeeper.org).

Sincerely,

Ben Kirsch, Legal Director  
Ogeechee Riverkeeper
